June 28, 2019

To the Members of the Board of Directors and Citizens of the Upper Pine River Fire Protection District:

State law requires that governmental entities publish within six months of the close of each calendar year (unless such deadline is extended) a complete set of financial statements presented in conformity with accounting principles generally accepted in the United States of America (US GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. Pursuant to that requirement, we hereby issue the comprehensive annual financial report of the Upper Pine River Fire Protection District ("District") for the fiscal year ended December 31, 2018.

This report consists of management's representations concerning the finances of the District. Consequently, management assumes full responsibility for the completeness and reliability for all the information presented in this report. To provide a reasonable basis for making these representations, management of the District has established a comprehensive framework that is designed to protect the government's assets from loss, theft or misuse, and to compile sufficient reliable information for the presentation of the Upper Pine River Fire Protection District's financial statements in conformity with US GAAP. As management, we assert to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

The Upper Pine River Fire Protection District's financial statements have been audited once again by Rubin Brown LLP, a firm of licensed certified public accountants who regularly audit governmental entities in Colorado. The goal of the independent audit was to provide reasonable assurance that the financial statements of the Upper Pine River Fire Protection District for the fiscal year ended December 31, 2018, are free of material mis-statements. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and assessing the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion and that Upper Pine River Fire Protection District's financial statements for the year ended December 31, 2018, are fairly presented in conformity with US GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

Generally accepted accounting principles require that management provide a narrative introduction, overview and analysis to accompany the financial statements in the form of Management's Discussion and Analysis ("MD&A"). This letter of transmittal is designed to complement MD&A and should be read in conjunction with the audit. The Upper Pine River Fire Protection District's MD&A can be found immediately following the report of the independent auditors.

Profile of the District

Upper Pine River Fire Protection District was chartered September 20, 1974 and confirmed in an election on November 19th, 1974 through merger of the Vallecito Fire Department and the Bayfield Volunteer Fire Departments. The Forest Lake Metro District Fire Department merged into the district May 3rd, 1988. During the 2006 calendar year, the District transitioned from a volunteer to a paid fire department. The District provides fire suppression (structural, wildland and vehicle), advanced life support emergency medical service/ambulance service to include patient transport, technical rescue (water, ice, low and high angle rope, confined space, vehicle extrication), fire prevention, fire code enforcement, public education, fuels mitigation and hazardous material and disaster response.

The district is accredited for the EMS operations through the Committee on Accreditation of Ambulance Services and is the smallest agency in the United States and the only fire based organization in the State

Upper Pine River Fire Protection District | Phone: 970 884-9508

515 Sower Drive, Bayfield, CO

of Colorado to attain this accreditation. It is a district that responds to all hazards with a focus on customer service.

These services are provided to a fulltime population of approximately 15,000 in 285 square miles of eastern La Plata County and Western Archuleta County in southwest Colorado. The District sees a seasonal increase for the summer of up to 30,000 filling vacation homes and campgrounds at Lake Vallecito. The District also has completed annexation several large ranches in Western Archuleta County along Highway 160 that are within the 5 mile insurance service rating of UPRFPD Station 8 to afford homeowners better rates on their property insurance. The District is funded by property taxes, contracts, ambulance revenue, Federal and State grants, wild fire deployments and donations from Corporations and private citizens.

Upper Pine River Fire Protection District is governed by a five-member Board elected to four year terms. The governing Board has fiduciary responsibilities set forth in the IGA. The Board is responsible for hiring the Chief of the Department. The Chief is responsible for carrying out the policies of the Board, for the leadership and supervision of the day-to-day operations of the District.

The annual budget and budget process serves as the foundation for the Upper Pine River Fire Protection District's financial planning and control. Justified budget request and prioritization of budget items are processed in the District's strategic planning meeting in September of each year. The District Board of Directors holds a public hearing and adopts its final budget no later than December 31st each year.

Appropriations for the budget are adopted on a total fund basis. The Board of Directors may make additional appropriations during the budget year for expenditures required, but not in excess of the amount of actual revenues exceeding budgeted revenues and un-appropriated surplus for the fund. The Chief may transfer any unencumbered appropriation balance or a portion thereof from one classification of expenditure to another within the budget in order to carry out the goals and objectives of the Board of Directors and the District. The district holds reserves in accordance with an Annual Operating Plan with the State of Colorado for potential wildland fire incidents and disasters.

Factors Affecting Financial Condition

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective, the specific environment within which the Upper Pine River Fire Protection District operates. The following is a recap of the economic factors impacting the District.

Local Economy

General: The Pine River Valley geographic area is located in the southwestern part of Colorado in the eastern part of La Plata County. The Town of Bayfield, Town of Ignacio and City of Durango make up the

Durango "Micropolitan" Area. La Plata County has experienced considerable economic and population growth from the late 1980's to 2008. Like most of the United States the 2009 local economy showed considerable financial declines over previously prosperous years. The local economy has shown slight but steady gains during the period of 2011-2018. In 2018 the county had an unemployment rate of 2.3% down from last year's 2.6%. The labor force has been flat at 32,039. In LaPlata County significant increases in housing starts and home sales occurred in 2018. New building permits were at 71 in 2018 and there were 209 home sales with an average price of \$486,000.

La Plata County is an ideal location for entrepreneurs and innovative businesses that want to grow and succeed. A shortage of highly skilled workers is developing along with a shortage in affordable housing. Much of this is due to a high desire to live in La Plata County which enjoys an outstanding quality of life for them, their employees and their families. Few other communities in the Rocky Mountains can offer businesses the resources that La Plata County can:

Upper Pine River Fire Protection District Phone: 970 884-9508

515 Sower Drive, Bayfield, CO

- Three colleges- Fort Lewis College, a four year liberal arts college with a census of approximately 4,000 students, San Juan College in Farmington which provides a variety of technical and liberal arts degrees and Pueblo Community College which provides an educated and skilled workforce.
- Customized workforce training to help your employees keep up with technology and new ideas
- A vibrant and growing regional airport with direct service to major international gateways such as Dallas, Denver, and Phoenix
- High speed internet and 4G wireless service capable of serving cloud technology, high-capacity data transfers, and distributed workforce and operations
- Low property taxes and low employee turnover, which reduce your ongoing operating costs

Fort Lewis College Department of Economics believes that Durango's present economy is primarily based on tourism, now generating approximately 28% of all activity in La Plata County. The Upper Pine River Fire Protection District incorporate three general planning areas, the Town of Bayfield, the Vallecito Lake recreation area and community and the Forest Lakes Metro District, the largest residential subdivision in La Plata County. Most of these planning areas serve as residence for the employers in Durango. Restrictions on new oil and gas permits have hampered revenues from this source into the Fire District's income. A continued change to the residential assessment rates due to the Colorado Gallagher amendment continues to generate lower tax revenue for the district.

The Town of Bayfield:

The Town of Bayfield is a statutory Town located in La Plata County within the Upper Pine River Fire Protection District. The town sits at an elevation of about 6900 feet, in the beautiful Pine River Valley, with spectacular vistas in all directions. The town is a bedroom community to the Durango "Micropolitan" area offering more economical, lower density, and ranch style living. The average home price is \$265,000 as compared to Durango at \$435,000. Bayfield and the 20 minutes driving radius has a median household income of \$59,185, above the National averages.

Bayfield is home to approximately 2,702 residents within the town and another 12,528 in the surrounding area the fire district serves. Bayfield acts as the commercial and cultural center for eastern La Plata County. The anchor business establishments are Lewis True Value Hardware, Southwest Agriculture Supply, Riverside RV Park and Gosney, LLC. Bayfield prides itself on our small town atmosphere and long-standing sense of community offering a nostalgic 4th of July Parade and an intact main street commerce area known as Mill Street. The Town of Bayfield was incorporated in 1906 when the Bay family and the Schiller family each donated land to create a supply Town near the Pine River. Bayfield was named after Mr. William Bay when he won a coin toss between himself and Mr. Schiller. Had the toss gone the other way, it is said the Town would have been named "Schillerville".

Modern-day Bayfield residents enjoy an ideal four-season climate that averages some 300 days of sunshine every year, together with moderate temperatures and low humidity, year-round. This ideal recreational climate promotes all sorts of outdoor family activities while any type of enthusiast can find what they're looking for. Whether hiking or biking, hunting or fishing, winter skiing or summer water sports, or exploring the cultural histories of Native American ruins and early Pioneer life, all are available within a short drive, and in almost any direction. The town lies on US Highway 160 which is the main southern transport corridor between the major metropolitan centers in Denver, Pueblo and Colorado Springs. The town is strategically located between Mesa Verde and Great Sand Dunes National Park. For train enthusiasts it is between two of the most visited tourist railroads; the Durango Silverton Narrow Gauge Railroad and the Cumbres and Toltec Railroad.

Bayfield has a strong school district. The Bayfield School District has long been recognized as one of Colorado's finest and was awarded "Colorado School Board of the Year" in 2007. In 2016, the school district passed a mill levy and completed construction of a new elementary school and improvements to the existing primary school. The library was named the Best Small-town Library in American in 2013. Bayfield also boasts a quaint downtown known as Mill Street that has ball fields for youth and adult sports

Upper Pine River Fire Protection District | Phone: 970 884-9508

515 Sower Drive, Bayfield, CO

Fax: 970 884-2444

along with the ever-popular Bayfield Heritage Days held each September. The Bayfield High School Football team took the 2A State Football Championship for 2018.

The Town of Bayfield is serviced by Upper Pine River Fire Station 1 and residents fund the district with a property tax mill levy. Real estate values are increasing within the area and there were numerous new housing starts in 2018. Over 40 new home sites are under construction in a subdivision called Mesa Meadows and the Dove Ranch subdivision was built out in 2018. Housing prices are favorable due to low supply and higher price in Durango. Many of the residents in Bayfield work in the oil and gas industry, public safety, or health care.

Vallecito Lake:

Sheltered in a secluded mountain valley 8,000 feet above sea level, Vallecito Lake is one of the largest and most beautiful bodies of water in Colorado, Vallecito, Spanish for "Little Vallev", and ancestral home to many of Colorado's Ute Indians, became the name of the sparkling waters of the lake it surrounded. Located in the Southwestern part of the state just 18 miles from Durango, Vallecito provides a perfect base for enjoying the Four Corners area and its many wonders. The lake attracts Texans and Oklahomans looking to escape the summer heat and to enjoy trophy fishing and hunting in the surrounding mountains and streams. Boating, skiing, and fishing generate seasonal income for the area and it is home to several large ranches and vacation homes. The Vallecito Lake is serviced by Upper Pine River Fire Station 4. In 2018 Vallecito had a significant downward number of visits to the local campgrounds due to wildland fires and poor air quality.

Forest Lakes Metro District:

Forest Lakes is the largest subdivision in southwestern Colorado. This community is located in La Plata County, Colorado and covers 1,865 acres with 1,600 parcels and 764 structures. Forest Lakes is a remote rural community nestled in the mountains of La Plata County, north of Bayfield, Colorado, The community borders BLM and state lands on the north, USFS lands to the east, and private lands to the south. Forest Lakes is home to about 1,800 residents with 75 percent year-round residents and the remainder residing in Forest Lakes seasonally, primarily during the summer months. Many residents commute to Bayfield, Ignacio, and Durango for work, and many are retired. About half of the 1600 parcels have been built on. The average parcel size is 1 acre with some lots as small as 1/4 acre. Forest Lakes is covered by Upper Pine River Fire Station 5 with full time staff.

Long-term Financial Planning:

The Upper Pine River Fire Protection District Board of Directors developed a Strategic Plan in 2012 to create sustainability and bring an innovative service delivery model to the fire district. As the district has grown or evolved from a volunteer department, sophistication of accounting standard practices reflective of government accounting has been initiated. As part of projecting financial needs a strategic planning process has been implemented. The strategic plan commences in January 2016 to predict and plan for 5, 10 and 20 year increments specifying vehicle replacements and capital projects. The district has been very successful in grant acquisitions that have allowed for accelerated increases in the reserve funds striving for one year of operating expenses to be held in reserve.

The district operates with certain fees for service events and collects ambulance revenue, response fees and the hazardous materials fees from users of this particular service delivery by the fire district. The ambulance collection rate is 56% which is on par with the industry average.

The district has implemented partnerships and business models to use surplus or excess resources within the district to generate revenue for the fire district. The district has recently purchased equipment that is in high demand for regional wildfire assignments and deployed a business model structuring short term leases for three years or less leaving the remaining 5-7 year life span of the vehicles to generate income

Upper Pine River Fire Protection District | Phone: 970 884-9508 Fax: 970 884-2444

515 Sower Drive, Bayfield, CO

The Upper Pine River Fire District maintains a significant fleet to support the 8 stations covering the 285 square miles of the fire district. To ensure efficiencies and provide for a long term vehicle replacement plan, the district has begun to sequester monies for replacement the fleet and physical place on appropriate depreciation schedules to ensure timely and cost effective replace without incurring additional bond initiatives. Surplus vehicles are being sold and the fleet is being right sized for efficiency of operations and reduced maintenance cost.

The District currently has long term lease/purchase agreements for the administration building and equipment of approximately \$1.2 million. The district has restructured the leases to take advantage of historically low interest rates. This has allowed the district to reduce lease payments burdening the operating funds and hasten the elimination of the bond service.

The voters granted the District an increase in the current mill levy to 10.9 mills from 4.95 mills in order to compensate for downturns in oil and gas revenue due production cost in the region currently outpacing market values for natural gas. The voter approved initiative has sunset legislation eliminating or calling for a reauthorization in 2024 designed to correspond with the retirement of the bond service.

Refinancing of the bond debt to a lower interest rate resulted in an overall savings of approximately \$25,000 annually. After the economic downturn in late 2008, Upper Pine River Fire Protection District management and board recognized that they would be facing a decline in property valuations which would mean a decline in revenues beginning in 2011. Starting in 2009, management made the decision to keep operating expenses as flat as possible and to reduce capital expenditures to only critical items. Excess revenues were moved into the fund balance with the idea that they would be available to fund operations when revenues declined. Austerity measures have continued through 2018 in order to restore reserve funds to a goal \$1.8 million.

Significant wild fire risk plagued the district and Colorado in 2018. In May 2018 a 52 acre fire occurred in the fire district. Suppression costs were approximately \$370,000. State of Colorado grants for aviation assets and an insurance settlement with the responsible party allowed the fire district to have no additional impacts to the budget. Over \$12 million in property and homes was saved from this fast moving fire at the above mentioned expense demonstrating a significant return on investment.

While the GFOA recommends two months of operating expenses or 17% of the budget set aside for emergencies, due to the nature of the fire district's mission and potential for a significant wildfire cost, the Fire Chief sees one to two years of operating expenses necessary. The District has set as a goal one year of operating expenses assigned to the Reserves for Economic Uncertainty or the category "Unassigned" as designated by GASB 54 in the financial strategic plan.

Awards and Acknowledgements:

Upper Pine River Fire Protection District received The Government Finance Officers Association of the United States and Canada (GFOA) Certificate of Achievement for Excellence in Financial Reporting for its comprehensive annual financial report for the fiscal year ended December 31, 2017. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

We would like to express our appreciation to Rubin Brown, LLP; the firm that serves as the District's external auditors. The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated service and assistance provided by our accountant, Mickey Ramsey, CPA.

I would like to recognize the District's Board of Directors for their support for the District, its fiscal responsibility and the highest standards of professionalism in the management of the District's finances. Three of the Board of Directors were reelected to four year terms. Also, to the citizens and stakeholders

Upper Pine River Fire Protection District Phone: 970 884-9508

515 Sower Drive, Bayfield, CO | Fax: 970 884-2444

of the Upper Pine River Fire Protection District for entrusting the judicial use of their tax dollars for the greater good of the community and our corporate donors for their generosity and support. Lastly, to the emergency responders and support staff that brings a level of excellence to rural fire and EMS services delivered in the Pine River Valley.

Respectfully submitted,

Board of Directors Upper Pine River Fire Protection District Bayfield, Colorado

Report On The Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund and the aggregate remaining fund information of Upper Pine River Fire Protection District (the District) as of and for the year ended December 31, 2018, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility For The Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund and the aggregate remaining fund information of the District as of December 31, 2018 and the respective changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages i through v, the budgetary comparison schedule, schedules of the District's proportionate share of the net pension assets, schedules of the District's contributions to the pension plans and notes to required supplementary information on pages 48 through 54 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The introductory section, individual fund budgetary comparison schedule and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The individual fund budgetary comparison schedule is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the individual fund budgetary comparison schedule is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

June 28, 2019

KulinBrown LLP

Management's Discussion and Analysis

As management of Upper Pine River Fire Protection District (the "District"), we offer readers of the District's financial statements this narrative overview and analysis of the financial activities of the District for the fiscal year ended December 31, 2018.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements are composed of three components:

- 1) Government-wide financial statements;
- 2) Fund financial statements:
- 3) Notes to the financial statements.

This report also contains other supplementary information in addition to the basic financial statements themselves. Comparative data is presented when available.

Financial Highlights

- 1. The District's net position at the end of 2018 is \$4,726,397 compared to \$ 4,380,963 at the end of 2017.
- Total revenues for the year ended December 31, 2018 were \$4,863,145 compared to total revenues of \$ 4,190,521 in 2017; an increase of \$672,624 due to substantial allocation of resources to wildland firefighting.
- 3. The District made use of grant monies awarded from State and Federal funding sources in the amount of \$204,739.

Government-wide financial statements

The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business. The governmental activity of the District is primarily providing fire protection service for the Town of Bayfield, the Upper Pine River and Upper Florida River Valleys.

The Statement of Net Position presents information on all the District's assets and liabilities, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The Statement of Activities presents information showing how the government's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods. (e.g., earned but not used vacation leave).

The government-wide financial statements can be found on pages 14 through 15 of this report.

Fund financial statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The District had two funds in 2018, the General Fund and Debt Service Funds, which are governmental funds.

Governmental funds

Governmental funds are used to account for essentially the same function reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of expendable resources, as well as on balances of expendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds are more narrow than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. A reconciliation of the fund balance as reported in the governmental funds to the net change in fund balance to the change in net position has been provided to facilitate the comparison between governmental funds and governmental activities.

The District adopts an annual appropriated budget for its General and Debt Service Funds. A budgetary comparison statement has been provided for these funds to demonstrate compliance with this budget.

The governmental fund financial statements are presented on pages 16 and 18 of this report.

Notes to the financial statements

The notes provided additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 20 through 47 of this report.

Statement of Net Position

The following is a condensed comparative summary of the District's net position at December 31:

	<u>2018</u>	<u>2017</u>
Current and other Assets Capital Assets Total Assets	\$ 5,893,519 \$ 5,164,213 \$ 11,057,732	\$ 5,371,351 <u>\$ 5,707,716</u> \$ 11,079,067
Deferred Outflows of Resources	\$ 791,257	\$ 721,007
Current Liabilities Long Term liabilities Total Liabilities	\$ 1,060,937 \$ 2,694,228 \$ 3,755,165	\$ 948,024 \$ 3,494,375 \$ 4,442,399
Deferred Inflows of Resources	\$ 3,367,427	\$ 2,976,712
Net Investment in capital assets Restricted Unrestricted	\$ 2,315,616 \$ 175,311 \$ 2,235,470	\$ 2,179,305 \$ 162,322 \$ 2,039,336
Total net position	<u>\$ 4,726,397</u>	<u>\$ 4,380,963</u>

Statement of Activities

The statement of activities reflects the cost of operation and the charges for services and receipt of grants offsetting those services. The following detail reflects the total cost of services supported by operating revenues and property taxes, as well as other general revenues, resulting in the overall change in net position for the fiscal years 2018 and 2017.

Following is a condensed comparative summary of the District's revenues and expenses for the year ended December 31:

Desember on					C	perating		et (Expense) evenue and

Financial Analysis

In 2018 our property tax revenues stabilized from the prior year due to an increase in residential assessments and new construction. Fire district management was alerted by the Assessor's office that oil and gas values would see declines starting in fiscal 2012. In preparation for the projected decline the district committed a majority of the excess revenue from 2010 to reserves, did not fill several open administrative positions, froze wages and reduced spending where appropriate without reducing services.

The District offset property tax decreases with grant monies received including \$33,000 for capital projects, \$116,000 for staffing and \$55,000 for property mitigation. The wildland fire program continued to have a positive impact on the finances of the District as serving as a cooperator to local state and national fires provided the district with \$1,143,751 in additional revenues. These additional revenues allowed the District to increase services to national standards and stabilize the financial positions and cash reserves of the District. In the last several years, the District has increased reserves by over \$1,200,000.

Governmental Funds

The focus of the District's governmental funds is to provide information on near-term inflows, outflows, and balances of expendable resources. Such information is useful in assessing the District's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

At the end of the current fiscal, the District's governmental funds reported an ending fund balance of \$1,758,058 in the general fund and an ending funding balance of \$57,378, in the debt service fund. Reserved fund balance of \$117,933 is not available for new spending because it has been reserved by TABOR.

Capital Assets

The Districts investment in capital assets for its governmental activities as of December 31, 2018 amounted to **\$5,541,966** (net accumulated depreciation). This investment in capital assets includes, land, buildings, equipment and vehicles. Additional information can be found in Note 5 to the financial statements.

Long-term Debt

At the end of the year the District had long-term debt outstanding of \$3,503,316 comprised of capital leases for equipment and the administration building, series 2013 G.O. Bonds and compensated absences. Additional information on the District's debt can be found in Note 6 of the financial statements. In 2013, the 2004 General Obligation Bonds were refunded with the 2013 General Obligation Bonds. The new bonds have an interest rate of 2.67%, compared to a maximum rate of 5.00% with old bonds. The maturity date of the new bonds is the same date as the old bonds. In 2014, the District refinanced two capital leases. The new lease has an interest rate of 2.38% compared to 4.878% and 4.8231% for the old leases. The maturity date of the 2014 lease is December 01, 2021.

Budget Analysis

The Fire District continues to use best practices in managing the finances and assets of the district. We continue to seek opportunities to enhance our revenue stream through aggressively pursuing grants and participation in revenue generating functions such as response to wild land fires. These opportunities continue to enhance our capabilities and service delivery. In 2018, the general fund realized gross revenues of **\$4,463,926**. We continue to recover direct costs of personnel, fuel as well as the additional income from rental rates of our equipment.

Our EMS billing and revenues were steady in 2018, and collection rates remain well above the national collection rate. Ambulance rates were increased effective January 2014 to reflect higher fuel prices and cover disposables for EMS. The amount collected helped fund the EMS Operations which can be described as vehicles, fuel, medical supplies, insurance and training.

Economic Factors, Trends and Future Plans

2018 tax revenue increased slightly despite lower assessed values on residential real property from the Gallagher amendment. As supply drops and the buildable land in the central part of the county becomes expensive, continued increases are anticipated in residential property values in the District with the next property valuation.

Buildable lots in the eastern La Plata County are now at a premium which is expected to send property values up significantly as inventory declines. Three large parcels that could result in as many as 300 additional homes are possible in Mesa Meadows, Homestead and a recently acquired parcel on the east side of Bayfield that has an existing master plan. As inventory decreases and pricing elevates it is anticipated that growth in housing will shift to the eastern side of the county in Bayfield and Forrest Lakes.

Factors that have allowed us to continue to fully operate with no reduction in service have been our continued response to national wildfires. That program brought \$1,143,751 in gross revenue to the district in 2018. We were also awarded \$25,000 in grant money to support the seasonal hand crew and approximately \$116,000 from a FEMA grant for staffing.

Request for information

This financial report is designed to provide a general overview of the District's finances for all those with and interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to:

NOTES TO FINANCIAL STATEMENTS December 31, 2018

1. Description Of Reporting Entity

The Upper Pine River Fire Protection District (the District) was established on November 26, 1974 as a special district as defined by Colorado State Statutes. The District was formed for the purpose of providing fire protection services for the Town of Bayfield and the Upper Pine River and Upper Florida River valleys. The District has its own elected governing board (the Board) and levies a tax on the property within the District for operations.

The District follows U.S. generally accepted accounting principles (GAAP), including Governmental Accounting Standards Board (GASB) accounting pronouncements that provide guidance for determining which governmental activities, organizations and functions should be included within the financial reporting entity. The accompanying comprehensive annual financial report includes the financial activities of the District as the primary government. The District formed the Upper Pine River Fire Protection District Financial Corporation (the Corporation) on November 10, 2014 for the purpose of acquiring leasehold interest in certain property and leasing the property to the District, and to serve such other purposes as set forth in the Colorado Revised Nonprofit Corporation Act. The District appoints the Board of Directors of the Corporation. The Corporation is included as a blended component unit in the District's financial statements.

The District is not financially accountable for any other organization, nor is the District a component unit of any other primary governmental entity.

2. Summary Of Significant Accounting Policies

Basis Of Presentation

The District's basic financial statements consist of government-wide statements, including a statement of net position and a statement of activities. The government-wide financial statements report information for the District as a whole. Individual funds are not displayed at this financial reporting level.

Notes To Financial Statements (Continued)

The statement of net position presents the financial position of the governmental activities of the District.

The statement of activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. Direct expenses are those that are specifically associated with a function and, therefore, clearly identifiable to that particular function. The District does not allocate indirect expenses to functions in the statement of activities.

The statement of activities reports the expenses of a given function offset by program revenues directly connected with the functional program. A function is an assembly of similar activities and may include portions of a fund or summarize more than one fund to capture the expenses and program revenues associated with a distinct functional activity. Program revenues include: (1) charges for services, which report fees and other charges to users of the District's services; (2) operating grants and contributions, which finance annual operating activities, including restricted investment income and (3) capital grants and contributions, which fund the acquisition, construction or rehabilitation of capital assets. These revenues are subject to externally imposed restrictions to these program uses. For identifying to which function program revenue pertains, the determining factor for charges for services is which function generates the revenue. For grants and contributions, the determining factor is to which function the revenues are restricted.

Taxes and other revenue sources not included with program revenues are reported as general revenues of the District. The comparison of direct expenses with program revenues identifies the extent to which each governmental function is self-financing or draws from the general revenues of the District.

Fund financial statements are designed to present financial information of the District at a more detailed level. Fund financial statements are provided for the District's governmental funds.

Fund Accounting

The accounts of the District are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, deferred outflows of resources, liabilities, deferred inflows of resources, fund balance, revenues and expenditures, as appropriate. The District uses one category of funds: governmental.

Notes To Financial Statements (Continued)

Governmental Funds

Governmental funds are those through which most governmental functions typically are financed. Governmental fund reporting focuses on the sources, uses and balances of current financial resources. Expendable assets are assigned to the various governmental funds according to the purposes for which they may or must be used. Fund liabilities are assigned to the fund from which they will be liquidated. The District reports the difference between governmental fund assets and deferred outflows of resources and liabilities and deferred inflows of resources as fund balance. The following are the District's major governmental funds:

General Fund - The General Fund is the general operating fund of the District. It is used to account for all financial resources except those required to be accounted for in another fund.

Debt Service Fund - The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, long-term obligation principal, interest and related costs.

Measurement Focus And Basis Of Accounting

The government-wide financial statements are prepared using the economic resources measurement focus. All assets, deferred outflows of resources, liabilities and deferred inflows of resources are included on the statement of net position, and the statement of activities reports revenues and expenses.

All governmental funds are accounted for using a flow of current financial-resources measurement focus. Within this measurement focus, only current assets, current liabilities and certain deferred outflows and inflows of resources generally are included on the balance sheet. The statement of revenues, expenditures and changes in fund balances reports the sources (i.e., revenues and other financing sources) and uses (i.e., expenditures and other financing uses) of current financial resources. This approach differs from the manner in which the governmental activities of the government-wide financial statements are prepared. Governmental fund financial statements, therefore, include a reconciliation with brief explanations to better identify the relationship between the government-wide statements and the governmental fund statements.

Notes To Financial Statements (Continued)

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements. Government-wide financial statements are prepared using the accrual basis of accounting. At the fund reporting level, the governmental funds use the modified accrual basis of accounting. Differences in the accrual and the modified accrual basis of accounting arise in the recognition of revenue, the recording of a deferred outflow of resources and in the presentation of expenses versus expenditures. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, revenues are considered to be available if they are collected within 60 days of the end of the current fiscal year. Property taxes, specific ownership taxes, grants and intergovernmental receipts and medical billings associated with the current fiscal period are susceptible to accrual and so have been recognized as revenues in the current fiscal period. Expenditures are generally recognized under the modified accrual basis of accounting when the related fund liability is incurred.

Use Of Estimates

The preparation of financial statements, in conformity with GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Budgets And Budgetary Accounting

The District Board follows these procedures in establishing the budgetary data reflected in the financial statements:

- 1. In accordance with the state statutes, prior to October 15, the Fire Chief submits to the Board a proposed operating budget for the calendar year commencing the following January 1. The operating budget includes proposed expenditures and the means of financing them for the upcoming year, along with estimates for the current year and actual data for the two preceding years. State statutes require a more detailed line item budget be submitted in summary form. In addition, more detailed line item budgets are included for administrative control.
- 2. Public hearings are conducted to obtain taxpayer comment.
- 3. Prior to December 31, the budget is legally enacted through passage of a resolution.

Notes To Financial Statements (Continued)

- 4. Budgets for the governmental funds are adopted on a basis consistent with GAAP.
- 5. Appropriations lapse at the end of each calendar year.
- 6. The District Board may authorize supplemental appropriations during the year.

Cash, Cash Equivalents And Investments

The District's deposits include amounts that are readily convertible to known amounts of cash, are not subject to significant risk from changes in interest rates and have a maturity of three months or less from the date of acquisition. Deposits include cash in checking accounts and certificates of deposits.

The District's investment policy, in accordance with Colorado law, authorizes investment in obligations of the U.S. Treasury, the State of Colorado, Colorado counties and school districts, repurchase agreements, financial institutions and local government investment pools. State statutes prohibit investments with a stated maturity date greater than five years, unless allowed by District Charter.

Investments are measured at fair value in accordance with GASB Statement No. 72, Fair Value Measurement and Application, and GASB Statement No. 79, Certain External Investment Pools and Pool Participants.

Interfund Balances

On the fund financial statements, receivables and payables resulting from short-term interfund loans are classified as "interfund receivables/interfund payables." These amounts are eliminated in the governmental activities column on the statement of net position.

Exchange transactions between funds are reported as revenues in the seller funds and as expenditures/expenses in the purchaser funds. Flows of cash or goods from one fund to another without a requirement for repayment are reported as interfund transfers. Interfund transfers are reported as other financing sources (uses) in governmental funds. Repayments from funds responsible for particular expenditures/expenses to the funds that initially paid for them are not presented on the government-wide financial statements.

Transfers between governmental funds are eliminated in the government-wide financial statements.

Notes To Financial Statements (Continued)

Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in the financial statements. Prepaid items of the District consist of expenditures related to insurance. Prepaid items are valued at cost and are recorded as expenditures in governmental funds when purchased.

Property Taxes

Annual property taxes are levied and certified by the County Treasurer in December of the current year. On January 1 of the following year, the County Treasurer bills the property owners, thus establishing an enforceable lien on the property. The County Treasurer collects the property taxes and remits the collections to the District, net of a collection fee, on a monthly basis during the year that follows the levy. Since property taxes are levied in December for the next calendar year's operations, the total levy is reported as taxes receivable and a deferred inflow - unavailable revenue.

Capital Assets

Capital assets, which include property, plant and equipment, are reported in the applicable governmental column in the government-wide financial statements. Capital assets are defined by the District as assets with an initial individual cost of \$5,000 or more and an estimated useful life of more than one year. Capital assets are recorded at historical cost or estimated historical cost if actual historical cost is not available.

Donated capital assets are recorded at their acquisition value on the date donated.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the life of the asset are not capitalized. Improvements are capitalized and depreciated over the remaining useful lives of the related capital assets, as applicable. Property, plant and equipment of the District are depreciated using the straight-line method over the following estimated useful lives:

	Years
Buildings and improvements	20 - 40
Equipment	5 - 10
Vehicles	10 - 15

Notes To Financial Statements (Continued)

Compensated Absences

Regularly employed, full-time employees of the District are allowed to accrue vacation time. Employees are considered full-time if they are regularly employed for at least 32 hours per week. Vacation accruals are based on years of service as follows:

1 - 12 months of service	5 days
2 - 5 years of service	10 days
6 - 10 years of service	15 days
11 - 20 years of service	24 days

Fire suppression and emergency medical employees assigned to fire suppression duty and working 24-hour shifts accrue vacation time annually, after completing 6 months of service at the following rate:

1 - 12 months of service	96 hours/year
13 - 59 months of service	144 hours/year
60+ months of service	192 hours/year

Employees are also allowed to accrue sick time up to a maximum of 750 hours. Employees are eligible for payment of sick time at the following rate:

0 to 5 years of service	0% paid
6 to 15 years of service	50% paid
16+ years of service	100% paid

Vacation and sick leave benefits are recorded as earned, and a liability is recorded on the government-wide financial statements. For governmental funds purposes, a liability for these amounts is reported only if the amount is due at fiscal year end.

Long-Term Liabilities

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities. Debt premiums and discounts are amortized over the life of the bonds using the effective interest method.

In the fund financial statements, governmental fund types recognize debt premiums and discounts during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources, while discounts on debt issuances are reported as other financing uses. Issuance costs are reported as debt service expenditures.

Notes To Financial Statements (Continued)

Deferred Outflows/Inflows Of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/expenditure) until that time. The deferred charge on advanced refunding is recorded as a deferred outflow. A deferred charge on advanced refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. The District has also recognized deferred outflows of resources in the government-wide financial statements in accordance with pension reporting presentation requirements.

In addition to liabilities, the statement of net position and governmental funds balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position or fund balance that applies to a future period(s) and so will *not* be recognized as an inflow of resources (revenue) until that time. Property tax revenue that is related to a future period is recorded as a deferred inflow. These amounts are deferred and will be recognized as an inflow of resources in the period that the amounts become available, at both the governmental fund level and in the period the taxes are levied at the government-wide reporting level. The District has also recognized deferred inflows of resources in the government-wide financial statements in accordance with pension reporting presentation requirements.

Fund Balance/Net Position

In the fund financial statements, governmental funds report the following classifications of fund balance:

Nonspendable - includes amounts that cannot be spent because they are either not spendable in form or because they will not convert to cash soon enough to affect the current period, and resources that must be maintained intact pursuant to legal or contractual requirements

Restricted - includes amounts restricted by external sources (creditors, laws of other governments, etc.) or by constitutional provision or enabling legislation

Notes To Financial Statements (Continued)

Committed - includes amounts that can only be used for specific purposes. Committed fund balance is reported pursuant to resolutions passed by the Board, the District's highest level of decision-making authority. Commitments may be modified or rescinded only through resolutions approved by the Board.

Assigned - includes amounts the District intends to use for a specific purpose, but do not meet the definition of restricted or committed fund balance. The District's adopted policy does not include a specific person designated to assign fund balances.

Unassigned - includes amounts that have not been assigned to other funds or restricted, committed or assigned to a specific purpose within the General Fund

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance are available, the District considers restricted funds to have been spent first. Although not included in a formal policy, the District considers decreases to fund balance to first reduce committed, then assigned and then unassigned balances, in that order.

Net position represents the difference between assets, deferred outflows of resources, liabilities and deferred inflows of resources. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition or construction of improvements on those assets, excluding unspent bond proceeds. Net position is reported as restricted when there are limitations imposed on its use, either through the enabling legislation adopted by the District or through external restrictions imposed by creditors, grantors, laws or regulations of other governments. It is the District's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

Notes To Financial Statements (Continued)

Pensions

For purposes of measuring the net pension (asset) liability, deferred outflows of resources and deferred inflows of resources related to pensions and pension expense (benefit), information about the fiduciary net position of the Statewide Defined Benefit Pension Plan (SWDBP) and the Statewide Hybrid Defined Benefit Component Pension Plan (SWHDBP) and additions to/deductions from SWDBP's and SWHDBP's fiduciary net position have been determined on the same basis as they are reported by the plans. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value. The general fund is used to liquidate any pension liabilities.

3. Cash, Cash Equivalents And Investments

Deposits

The Colorado Public Deposit Protection Act (PDPA) requires that all units of local government deposit cash in eligible public depositories. Eligibility is determined by state regulators. Amounts on deposit in excess of federal insurance levels must be collateralized. The eligible collateral is specified by PDPA. PDPA allows the institution to create a single collateral pool for all public funds. The pool is to be maintained by another institution or held in trust for all the uninsured public deposits as a group. The State Regulatory Commission for banks is required by statute to monitor the naming of eligible depositories and reporting of the uninsured deposits and assets maintained in the collateral pools.

Federal Deposit Insurance Corporation coverage for government accounts is \$250,000 per official custodian. At December 31, 2018, the District's cash deposits had a book balance of \$972,346 and a corresponding bank balance of \$1,020,075. The difference between the book and bank balances is due to outstanding checks and deposits not yet processed by the banks. Of the bank balance, \$374,663 was covered by federal depository insurance. The remainder of the bank balance, \$645,412 was collateralized with securities held by the pledging financial institution and covered by eligible collateral as determined by PDPA.

Notes To Financial Statements (Continued)

At December 31, 2018, the District had the following cash and investments:

	Boo	k Balance
Cash held with County Treasurer	\$	27,088
Cash and cash equivalents	Ψ	358,686
Money market funds		186,322
Certificates of deposit		613,660
Total	\$	1,185,756

Investments

The District is required to comply with state statutes which specify investment instruments meeting defined rating, maturity and concentration risk criteria in which local governments may invest, which include the following:

- Obligations of the United States and certain U.S. agency securities
- General obligation and revenue bonds of U.S. local government entities
- Bankers' acceptances of certain banks
- Commercial paper
- Certain securities lending agreements
- Written repurchase agreements collateralized by certain authorized securities
- Certain money market funds
- Guaranteed investment contracts
- Local government investment pools

At December 31, 2018, the District had the following investments:

		Investment Maturities (In Years)					
Investment	Rating	Less	Than One	On	e to Five	Total	
Money market funds Certificates of deposit	AAA/BB Not rated	\$	— 108,814	\$	186,322 \$ 504,846	186,322 613,660	
Total	1.00 14004	\$	108,814	\$	691,168 \$	799,982	

Custodial Credit Risk - Custodial credit risk is the risk that, in the event of bank failure, the District's deposits may not be returned to it. The District's policy requires all deposits to be held in PDPA-approved financial institutions to mitigate this risk.

Notes To Financial Statements (Continued)

Credit Risk - Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations.

Interest Rate Risk - Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

Foreign Currency Risk - Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The District is not exposed to foreign currency risk at year end.

Fair Value

The District categorizes its fair value measurements within the fair value hierarchy established by GAAP. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The District's investment in the money market fund has a Level 1 fair value measurement as of December 31, 2018.

4. Accounts Receivable

No allowance for uncollectible property taxes has been provided because the County Treasurer is empowered to file liens on properties where delinquencies exist. Accordingly, the District believes any delinquencies will eventually be paid.

Other receivables include amounts due from wildland fire billings and grants. All receivables are current and, therefore, due within one year. Management believes such receivables are fully collectible, and therefore, an allowance for doubtful accounts is not recorded.

The District estimates that a portion of its medical billings receivable will be uncollectible and a reserve for the uncollectible medical billings has been established. This reserve is examined annually and adjusted if appropriate. Medical billings are adjusted for contractual allowances at the time of billing. The allowance for doubtful accounts at December 31, 2018 is \$128,455.

Notes To Financial Statements (Continued)

5. Capital Assets

The following is a summary of changes in capital assets for the year ended December 31, 2018:

	Balance January 1,				De	Balance ecember 31,
	2018	Additions	Γ	eletions		2018
Capital assets not being depreciated:						
Land	\$ 377,753	\$ _	\$	_	\$	377,753
Capital assets being depreciated:						
Building	5,815,947	_		_		5,815,947
Equipment	933,879	36,929		_		970,808
Vehicles	6,449,661	31,022		208,967		6,271,716
Total	13,199,487	67,951		208,967		13,058,471
Accumulated depreciation for:						
Building	(1,575,783)	(150,007)		_		(1,725,790)
Equipment	(641,901)	(68,291)		_		(710, 192)
Vehicles	(5,274,087)	(393, 156)		208,967		(5,458,276)
Total	(7,491,771)	(611,454)		208,967		(7,894,258)
Capital Assets Being Depreciated - Net	5,707,716	(543,503)				5,164,213
Capital Assets - Net	\$ 6,085,469	\$ (543,503)	\$		\$	5,541,966

Depreciation expense for the year ended December 31, 2018 was \$611,454 and was charged to public safety.

6. Long-Term Liabilities

General Obligation Bonds

The District issued \$5,200,000 of General Obligation Bonds, Series 2004. The bonds were issued on June 1, 2004, with interest payments due June 1 and December 1 of each year, commencing December 1, 2005. The bonds mature in various amounts through 2024 and bear interest from 2.4% to 5.0%. The bonds are general obligations of the District. All of the taxable property within the District is subject to the levy of the general ad valorem property tax to pay principal and interest of the bonds.

Notes To Financial Statements (Continued)

The bonds were issued to (a) acquire, construct and equip new fire stations; (b) renovate and remodel existing fire stations; (c) acquire fire trucks and general fire equipment and (d) to refinance the 2002 Wells Fargo Bank Equipment and Building lease. Proceeds of the bonds were used to pay the costs of issuance of the bonds.

On December 27, 2013, the District issued General Obligation Refunding Bonds, Series 2013, in the amount of \$3,685,000, with an interest rate of 2.67%. The bonds were issued to advance refund all of the outstanding Series 2004 general obligation bonds. The net proceeds of \$3,623,355 (after payment of \$53,525 in underwriting fees and other issuance costs) were deposited in an irrevocable trust with an escrow agent to provide funds for the future debt service payments on the refunded bonds. As a result, the 2004 bonds are considered defeased and have been removed from the statement of net position.

The refunding of the Series 2004 bonds resulted in a difference between the reacquisition price of the Series 2013 bonds and the carrying amount of the old debt of \$121,269. This difference, reported in the statement of net position as a deferred outflow of resources, is amortized over the new debt's life using the effective interest method. The District achieved a cash flow difference and an deferred loss of approximately \$20,509 as a result of the refunding.

On November 26, 2014, the District issued Tax-Exempt Direct Purchase Lease Revenue Bonds, Series 2014, in the amount of \$2,600,000, with an interest rate of 2.38%. The bonds were issued to refund prior outstanding 2008 and 2009 capital leases with Pine River Valley Bank and resulted in a deferred loss on refunding of \$75,609 in deferred outflows of resources to be amortized over the life of the debt. The net proceeds of \$2,286,868 (after payment of \$76,097 in underwriting fees and other issuance costs) were used to terminate the 2008 and 2009 leases fully as of November 26, 2014. The agreement also requires that the District meet certain financial covenants.

Debt service requirements are as followed:

Year	Principal	Interest	Total
2019	\$ 719,508	\$ 85,235	\$ 804,743
2020	737,574	67,171	804,745
2021	756,066	48,677	804,743
2022	360,622	29,664	390,286
2023	370,251	20,035	390,286
2024	380,136	10,150	390,286
Total	\$ 3,324,157	\$ 260,932	\$ 3,585,089

Notes To Financial Statements (Continued)

The following is a schedule of the changes in long-term debt for 2018:

	Balance January 1, 2018		dditions	1	Reductions	De	Balance cember 31,	Current
	 2018	A	aaitions		Reductions		2018	Portion
2013 General Obligation Refunding Bonds	\$ 2,462,123	\$	_	\$	(324,547)	\$	2,137,576	\$ 333,213
2014 Lease Revenue Refunding Bonds	1,563,618		_		(377,037)		1,186,581	386,295
Total	4,025,741		_		(701,584)		3,324,157	719,508
Compensated Absences	141,185		109,985		(72,011)		179,159	89,580
Total Long-Term Liabilities	\$ 4,166,926	\$	109,985	\$	(773,595)	\$	3,503,316	\$ 809,088

Lease revenue bonds and compensated absence obligations are liquidated through the General Fund and the general obligation refunding bond is liquidated from the Debt Service Fund.

7. Pension Plans

The District maintains the following plans for pension benefits:

- Fire and Police Pensions Association (FPPA) Statewide Defined Benefit Plan (SWDBP)
- FPPA Statewide Hybrid Defined Benefit Plan (SWHDBP)

A summary of pension related items as of December 31, 2018 is presented below.

	No	et Pension Asset	of	Deferred Outflows Resources	Deferred Inflows of Resources		Pension Expense
SWDBP SWHDBP	\$	335,884 92,071	\$	614,697 78,753	\$	321,223 18,569	273,648 10,217
Total	\$	427,955	\$	693,450	\$	339,792	\$ 283,865

FPPA Statewide Cost-Sharing Defined Benefit Pension Plan Plan Description

Eligible employees of the District are provided with pensions through SWDBP, a cost-sharing multiple-employer defined benefit pension plan administered by the Fire & Police Pension Association of Colorado (FPPA).

Notes To Financial Statements (Continued)

Benefits Provided

SWDBP provides retirement and disability, annual increases and death benefits for members or their beneficiaries. A member is eligible for a normal retirement pension once the member has completed 25 years of credited service and has attained the age of 55.

The annual normal retirement benefit is 2% of the average of the member's highest 3 years' base salary for each year of credited service up to 10 years, plus 2.5% for each year of service thereafter. The benefit earned prior to January 1, 2007 for members of affiliated Social Security employers will be reduced by the amount of Social Security income payable to the member annually. Effective January 1, 2007, members currently covered under Social Security will receive half the benefit when compared to SWDBP. Benefits paid to retired members are evaluated and may be re-determined every October 1. The amount of any increase is at the Board's discretion and can range from 0% to the higher of 3% or the Consumer Price Index.

A member is eligible for an early retirement at age 50 with at least 5 years of service or after 30 years of service. The early retirement benefit equals the normal retirement benefit reduced on an actuarially equivalent basis. Upon termination, an employee may elect to have member contributions, along with 5% as interest, returned as a lump sum distribution. Alternatively, a member with at least 5 years of accredited service may leave contributions with SWDBP and remain eligible for a retirement pension at age 55 equal to 2% of the member's average highest 3 years' base salary for each year of credited service up to 10 years, plus 2.5% for each year of service thereafter.

Contributions

The Plan sets contribution rates at a level that enables all benefits to be fully funded at the retirement date of all members. Contribution rates are established by state statute. Employer contribution rates can only be amended by state statute. Member contribution rates can be amended by state statute or election of the membership.

Members of SWDBP and their employers are contributing at the rate of 9.5% and 8%, respectively, of base salary for a total contribution rate of 17.5% in 2017. In 2014, the members elected to increase the member contribution rate to SWDBP beginning in 2015. Member contribution rates will increase 0.5% annually through 2022 to a total of 12% of base salary. Employer contributions will remain at 8.0% resulting in a combined contribution rate of 20% in 2022.

Notes To Financial Statements (Continued)

Contributions from members and employers of departments re-entering the system are established by resolution and approved by the FPPA Board of Directors. The re-entry group has a combined contribution rate of 21.5% of base salary through 2017. It is a local decision as to whether the member or employer pays the additional 4% contribution. Per the 2014 member election, the re-entry group could also have their required member contribution rate increase 0.5% annually beginning in 2015 through 2022 for a total combined member and employer contribution rate of 24% in 2022.

The contribution rate for members and employers of affiliated Social Security employers is 4.755% and 4%, respectively, of base salary for a total contribution rate of 8.75% through 2017. Per the 2014 member election, members of the affiliate Social Security group will have their required contribution rate increase 0.25% annually beginning in 2015 through 2022 to a total of 6% of base salary. Employer contributions will remain at 4% resulting in a combined contribution rate of 10% in 2022.

Employer contributions are recognized by SWDBP in the period in which the compensation becomes payable to the member and the District is statutorily committed to pay the contributions to SWDBP. Employer contributions recognized by SWDBP from the District were \$121,708 for the year ended December 31, 2018.

Pension Assets, Pension Benefit, Deferred Outflows Of Resources And Deferred Inflows Of Resources Related To Pensions

At December 31, 2018, the District reported a net pension asset of \$335,884 for its proportionate share of the net pension asset. The net pension asset was measured as of December 31, 2017, and the total pension asset was determined by an actuarial valuation as of January 1, 2018. The District's proportion of the net pension asset was based on District contributions to SWDBP for the calendar year 2017 relative to the total contributions of participating employers to SWDBP based upon the January 1, 2017 actuarial valuation.

At December 31, 2017, the District's portion was 0.233470%, which was a decrease of 0.04% from its proportion measured as of December 31, 2016.

Notes To Financial Statements (Continued)

For the year ended December 31, 2018, the District recognized pension benefit of \$151,940. At December 31, 2018, the District reported deferred outflows of resources and deferred inflows of resources related to SWDBP from the following sources:

Deferred Outflows Of Resources Difference between projected and actual	
earnings on pension plan investments	\$ 156,068
Changes of assumptions	50,606
Differences between expected and actual experience	242,220
Changes in proportionate share	44,095
Contributions subsequent to measurement date	121,708
Total Deferred Outflows Of Resources	\$ 614,697
Deferred Inflows Of Resources	
Difference between projected and actual	
earnings on pension plan investments	\$ 270,112
Differences between expected and actual experience	3,722
Changes in proportionate share	47,389
Total Deferred Inflows Of Resources	\$ 321,223

The amount of \$121,708 reported as deferred outflows of resources related to SWDBP, resulting from contributions subsequent to the measurement date, will be recognized as an increase of the net pension asset in the year ended December 31, 2019. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to SWDBP will be recognized in pension expense as follows:

For The Year Ended December 31,	
2019	\$ 38,517
2020	33,323
2021	(15,149)
2022	(33,126)
2023	34,402
Thereafter	113,799
Total	\$ 171,766

Notes To Financial Statements (Continued)

Actuarial Assumptions

The actuarial valuations for SWDBP were used to determine the total pension asset and actuarially determined contributions for the fiscal year ending December 31, 2017. The valuation used the following actuarial assumption and other inputs:

•	Total Pension Asset	Actuarially Determined Contributions
Valuation date	January 1, 2018	January 1, 2017
Actuarial cost method	Entry age normal	Entry age normal
Amortization method	Level % payroll, open	Level % payroll, open
Remaining amortization period	30 years	30 years
Actuarial assumptions:		
Investment rate of return*	7.5%	7.5%
Projected salary increases*	4.0% - 14.0%	4.0% - 14.0%
Cost of living adjustments	0.0%	0.0%
* Includes inflation at:	2.5%	2.5%

Effective January 1, 2016, the post-retirement mortality tables for nondisabled retirees is a blend of the annuitant and employee generational mortality tables with blue-collar adjustment projected with Scale BB in the *RP-2014 Mortality Tables Report*, published by the Society of Actuaries (RP-2014). The occupationally disabled post-retirement mortality assumption uses the same table as used for healthy annuitants, except there is a 3-year set-forward, meaning a disabled member age 70 will be valued as if they were a 73-year-old healthy retiree. The totally disabled post-retirement mortality assumption uses the RP-2014 generational mortality tables for disabled annuitants, except an additional provision to apply a minimum 3% mortality probability to males and a 2% mortality probability for females is included to reflect substantial impairment for this population. The pre-retirement off-duty Mortality Tables are adjusted to 55% of the RP-2014 mortality tables for active employees. The on-duty mortality rate is 0.00020.

Notes To Financial Statements (Continued)

The long-term expected rate of return on pension plan investments was determined using a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation (assumed at 2.5%). Best estimates of arithmetic real rates of return for each major asset class included in the fund's target asset allocation as of December 31, 2017 are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Rate Of Return
Clobal aquity	37.00%	8.33%
Global equity Equity long/short	9.00%	7.15%
Illiquid alternative	24.00%	9.70%
Fixed income	15.00%	3.00%
Absolute return	9.00%	6.46%
Managed futures	4.00%	6.85%
Cash	2.00%	2.26%
Total	100.00%	

Discount Rate

The discount rate used to measure the total pension liability was 7.5%. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the Board's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, the SWDBP fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension asset.

Projected benefit payments are required to be discounted to their actuarial present values using a single discount rate that reflects (1) a long-term expected rate of return on pension plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits) and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the plan's projected fiduciary net position is not sufficient to pay benefits).

Notes To Financial Statements (Continued)

For the purpose of the valuation, the expected rate of return on pension plan investments is 7.50%, the municipal bond rate is 3.78% (based on the weekly rate closest to but not later than the measurement date of the state and local bonds rate from Federal Reserve statistical release (H.l5)) and the resulting single discount rate is 7.50%.

Sensitivity Of The District's Proportionate Share Of The Net Pension Asset To Changes In The Discount Rate

Regarding the sensitivity of the net pension asset to changes in the single discount rate, the following presents the plan's net pension asset, calculated using a single discount rate of 7.50%, as well as what the plan's net pension (asset) liability would be if it were calculated using a single discount rate that is one percent lower (6.50%) or one percent higher (8.50%):

		1%		Current Discount	1%
	D	ecrease		Rate	Increase
		(6.50%)		(7.50%)	(8.50%)
Proportionate share of the net pension liability (asset)	\$	365,678	\$	(335,884)	\$ (918,441)

Pension Plan Fiduciary Net Position

Detailed information about SWDBP's fiduciary net position is available in FPPA's comprehensive annual financial report, which can be obtained on FPPA's website at http://www.fppaco.org.

Subsequent Event

The FPPA Board completed an actuarial experience study and approved changes to the actuarial assumptions effective January 1, 2019. The inflation assumption will remain at 2.5%. The investment return assumption will be reduced from 7.5% to 7.0%, which will increase the cost of pension benefits. The change in the investment return assumption reflects the reduced real return expectations from recent capital market data.

FPPA Statewide Cost-Sharing Hybrid Defined Benefit Plan

Plan Description

Eligible employees of the District are provided with pensions through SWHDBP, a cost-sharing multiple-employer pension plan administered by FPPA. SWHDBP is comprised of two components: defined benefit and money purchase.

Notes To Financial Statements (Continued)

Benefits Provided

A member is eligible for a normal retirement pension once the member has completed 25 years of credited service and has attained the age of 55.

The annual normal pension of the Defined Benefit Component is 1.5% of the average of the member's highest three years' base salary for each year of credited service. Benefits paid to retired members are evaluated and may be redetermined every October 1. The amount of any increase is at the Board's discretion and can range from 0% to 3%.

A member is eligible for early retirement within the Defined Benefit Component after completion of 30 years of service or attainment of age 50 with at least 5 years of credited service. The early retirement benefit equals the normal retirement benefit reduced on an actuarially equivalent basis. Upon termination, an employee may elect to have member contributions, along with 5% as interest, returned as a lump sum distribution from the defined benefit component. Alternatively, a member with at least 5 years of accredited service may leave contributions with the defined benefit component of the plan and remain eligible for a retirement pension at age 55 equal to 1.5% of the member's average highest 3 years' base salary for each year of credited service.

Contributions

The plan sets contribution rates at a level that enables all benefits to be fully funded at the retirement date of all members. The members of the SWHDBP plan and their employers are currently each contributing at the rate determined by the individual employer; however, the rate for both employer and members must be at least 8% of the member's base salary. The amount allocated to the Defined Benefit Component is set annually by the FPPA Board of Directors. Excess contributions fund the Money Purchase Component of the plan. The Defined Benefit Component contribution rate from July 1, 2017 through June 30, 2018 was 14.80%. The defined benefit component contribution rate from July 1, 2016 through June 30, 2017 was 13.50%.

Within the Money Purchase Component, members are always fully vested in their own contributions, as well as the earnings on those contributions. Vesting in the employer's contribution within the Money Purchase Component and earnings on those contributions occurs according to the vesting schedule set by the plan document at 20% per year after the first year of service to be 100% vested after five years of service. Employers and member contributions are invested in funds at the discretion of members. Employer contributions recognized by SWHDBP from the District were \$7,616 for the year ended December 31, 2018.

Notes To Financial Statements (Continued)

Pension Assets, Pension Benefit, Deferred Outflows Of Resources And Deferred Inflows Of Resources Related To Pensions

At December 31, 2018, the District reported a net pension asset of \$92,071 for its proportionate share of the net pension asset. The net pension asset was measured as of December 31, 2017, and the total pension asset was determined by an actuarial valuation as of January 1, 2018. The District's proportion of the net pension asset was based on District contributions to SWHDBP for the calendar year 2017 relative to the total contributions of participating employers to SWHDBP based upon the January 1, 2017 actuarial valuation.

At December 31, 2017, the District's portion was 0.470887%, which was a decrease of 0.11% from its proportion measured as of December 31, 2016.

For the year ended December 31, 2018, the District recognized a pension benefit of \$2,601. At December 31, 2018, the District reported deferred outflows and inflows of resources related to SWHDBP from the following sources:

Deferred Outflows Of Resources	
Difference between projected and actual	\$ 7,813
earnings on pension plan investments	
Changes of assumptions	1,930
Differences between expected and actual experience	42,758
Changes in proportionate share	18,636
Contributions subsequent to measurement date	 7,616
Total Deferred Outflows Of Resources	\$ 78,753
Deferred Inflows Of Resources	
Difference between projected and actual	
earnings on pension plan investments	\$ 14,377
Changes in proportionate share	 4,192
Total Deferred Inflows Of Resources	\$ 18,569

Notes To Financial Statements (Continued)

The amount of \$7,616 reported as deferred outflows of resources related to SWHDBP, resulting from contributions subsequent to the measurement date, will be recognized as an increase of the net pension asset in the year ended December 31, 2019. Other amounts reported as deferred outflows of resources related to SWHDBP will be recognized in pension expense as follows:

For The Year		
Ended December 31	,	
	_	
2019	\$	8,059
2020		7,842
2021		5,416
2022		4,502
2023		8,096
Thereafter		18,653
Total	\$	52,568

Actuarial Assumptions

The January 1, 2018 actuarial valuation was used to determine the actuarially determined contribution for the fiscal year ending December 31, 2017. The valuation used the following actuarial assumption and other inputs:

Actuarial method	Entry age normal
Amortization method	Level % of payroll, open
Amortization period	30 years
Long-term investment rate of	
return, net of pension plan investment	7.50%
expenses, including price inflation	
Projected salary increase	4.0% - 14.0%
Cost of living adjustments	0.00%
Included inflation	2.50%

Notes To Financial Statements (Continued)

Effective January 1, 2016, the post-retirement mortality tables for nondisabled retirees is a blend of the Annuitant and Employee RP-2014 generational mortality tables with blue collar adjustment projected with Scale BB. The occupationally disabled post-retirement mortality assumption uses the same table as used for healthy annuitants, except there is a 3-year set-forward, meaning a disabled member age 70 will be valued as if they were a 73-year-old healthy retiree. The totally disabled post-retirement mortality assumption uses the RP-2014 generational mortality tables for disabled annuitants, except an additional provision to apply a minimum 3% mortality probability to males and 2% mortality probability for females is included to reflect substantial impairment for this population. The pre-retirement off-duty mortality tables are adjusted to 55% of the RP-2014 mortality tables for active employees. The on-duty mortality rate is 0.02%.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Fund's target asset allocation as of December 31, 2017 are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Rate Of Return
Global equity	37.00%	8.33%
Equity long/short	9.00%	7.15%
Illiquid alternative	24.00%	9.70%
Fixed income	15.00%	3.00%
Absolute return	9.00%	6.46%
Managed futures	4.00%	6.85%
Cash	2.00%	2.26%
Total	100.00%	

Notes To Financial Statements (Continued)

Discount Rate

The discount rate used to measure the total pension liability was 7.50%. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the Board's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, the SWHDBP plan fiduciary net position was projected to be available to make all the projected future benefit payments to current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Projected benefit payments are required to be discounted to their actuarial present values using a single discount rate that reflects (1) a long-term expected rate of return on pension plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits) and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the plan's projected fiduciary net position is not sufficient to pay benefits).

For the purpose of the valuation, the expected rate of return on pension plan investments is 7.50%, the municipal bond rate is 3.31% (based on the weekly rate closest to but not later than the measurement date of the state and local bonds rate from Federal Reserve statistical release (H.l5)) and the resulting single discount rate is 7.50%.

Sensitivity Of The District's Proportionate Share Of The Net Pension Asset To Changes In The Discount Rate

Regarding the sensitivity of the net pension asset to changes in the single discount rate, the following presents the plan's net pension asset, calculated using a single discount rate of 7.50%, as well as what the plan's net pension asset would be if it were calculated using a single discount rate that is one percent lower (6.50%) or one percent higher (8.50%):

	 1% Decrease (6.50%)	Current Discount Rate (7.50%)		1% Increase (8.50%)
Proportionate share of the net pension asset	\$ (65,114)	\$ (92,071)	\$	(114,758)

Notes To Financial Statements (Continued)

Pension Plan Fiduciary Net Position

Detailed information about SWHDBP's fiduciary net position is available in FPPA's comprehensive annual financial report, which can be obtained at http://www.fppaco.org.

Subsequent Event

The FPPA Board completed an actuarial experience study and approved changes to the actuarial assumptions effective January 1, 2019. The inflation assumption will remain at 2.5%. The investment return assumption will be reduced from 7.5% to 7.0%, which will increase the cost of pension benefits. The change in the investment return assumption reflects the reduced real return expectations from recent capital market data.

8. Deferred Compensation Plan

The District participates in a deferred compensation plan (the 457 Plan) as defined under the Internal Revenue Code Section 457, which allows employees to make an elective deferral of a portion of earned compensation to the 457 Plan. The 457 Plan is a multi-employer plan administered by FPPA. Amendments to the 457 Plan may be made by the plan trustee. The District does not match employee contributions to the 457 Plan. For the year ended December 31, 2018, participating employees contributed \$37,284 to the 457 Plan.

9. Tax, Spending And Debt Limitations

Colorado voters passed an amendment to the State Constitution, Article X, Section 20, otherwise known as the Taxpayer Bill of Rights (TABOR), which has several limitations, including revenue raising, spending abilities and other specific requirements of state and local governments. TABOR is complex and subject to judicial interpretation. The District believes it is in compliance with the requirements of TABOR. However, the District has made certain interpretations of TABOR's language in order to determine its compliance. In May 1998, the District voters approved the District to collect, retain and spend all revenues and other funds collected from any source not excluded from fiscal year spending, effective January 1, 1998 and continuing thereafter.

Fund balance in the General Fund in the amount of \$117,933 at December 31, 2018 is restricted in accordance with TABOR.

Notes To Financial Statements (Continued)

10. Risk Of Loss

The District is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries and natural disasters. The District carries commercial insurance for all risks of loss, including workers' compensation and employee health and accident insurance. The District retains no risk of loss. There have been no settled claims resulting from these risks that have exceeded commercial insurance coverage in any of the past three fiscal years. There have been no significant reductions in insurance coverage.

11. Litigation

From time to time, the District is subject to claims and lawsuits that arise primarily in the ordinary course of its activities. It is the opinion of management that the disposition or ultimate resolution of such claims and lawsuits will not have a material adverse effect on the net position and change in net position of the District. Events could occur that would change this estimate materially in the near term.

NOTE TO REQUIRED SUPPLEMENTARY INFORMATION December 31, 2018

1. Budgets And Budgetary Accounting

The District Board adopts an annual budget for the General and Debt Service funds. Budgeted amounts for all funds are based on legally adopted budgets, including supplemental budget appropriations, if any, which are on a basis consistent with GAAP for each fund type. The Fire Chief is authorized to transfer budgeted amounts within and among departments; however, any revisions that alter total expenditures for any of the funds must be approved by the Board.

The budgetary comparison schedule included in the required supplementary information presents a comparison of budgetary data to actual results of operations for the General Fund, for which an annual operating budget is legally adopted. This fund utilizes the same basis of accounting for both budgetary purposes and actual results. The General Fund recognizes an expenditure for contingencies and capital replacements in its budget-basis expenditures.

Annual budgets are established for all funds of the District as required by Colorado law. Budgets reported in the accompanying financial statements are on the same basis of accounting as described above.

Expenditures may not legally exceed appropriations at the fund level. Budget amounts included in the financial statements are based on the final amended budget. After budget approval, the District Board may approve supplemental appropriations if an occurrence, condition or need exists which was not known at the time the budget was adopted. General Fund expenditures exceeded appropriated amounts primarily related to interest expense, which may be a violation of Colorado Revised Statutes.

On or before October 15 of each year, the District's budget officer must prepare and submit a proposed budget to the District Board for the next fiscal year. Thereupon, notice must be published stating, among other things, that the budget is open to inspection by the public and that interested electors may file or register any objection to the budget.

Note To Required Supplementary Information (Continued)

Subject to certain exceptions and exclusions discussed hereafter, the District must submit a request for property tax increases in excess of the statutory limitation to the Division of Local Government (if within TABOR limits) or submit the question of an increased level directly to the electors of the District at a general or special election. State law requires that the District adopt a budget prior to the certification of its mill levy to the County and file a certified copy of its budget with the Division of Local Government within 30 days of such adoption. Failure to do so can result in the County Treasurer's withholding future property tax revenues pending compliance by the District. Budget appropriations lapse at the end of each year. The encumbrance method is not used.
