515 Sower Drive, Bayfield, CO | Fax: 970 884-2444

June 30, 2021

To the Members of the Board of Directors and Citizens of the Upper Pine River Fire Protection District:

State law requires that governmental entities publish within six months of the close of each calendar year (unless such deadline is extended) a complete set of financial statements presented in conformity with accounting principles generally accepted in the United States of America (US GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. Pursuant to that requirement, we hereby issue the comprehensive annual financial report of the Upper Pine River Fire Protection District ("District") for the fiscal year ended December 31, 2020.

This report consists of management's representations concerning the finances of the District. Consequently, management assumes full responsibility for the completeness and reliability for all the information presented in this report. To provide a reasonable basis for making these representations, management of the District has established a comprehensive framework that is designed to protect the government's assets from loss, theft or misuse, and to compile sufficient reliable information for the presentation of the Upper Pine River Fire Protection District's financial statements in conformity with US GAAP. As management, we assert to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

The Upper Pine River Fire Protection District's financial statements have been audited once again by Rubin Brown LLP, a firm of licensed certified public accountants who regularly audits governmental entities in Colorado. The goal of the independent audit was to provide reasonable assurance that the financial statements of the Upper Pine River Fire Protection District for the fiscal year ended December 31, 2020, are free of material misstatements. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and assessing the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion and that Upper Pine River Fire Protection District's financial statements for the year ended December 31, 2020, are fairly presented in conformity with US GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

Generally accepted accounting principles require that management provide a narrative introduction, overview and analysis to accompany the financial statements in the form of Management's Discussion and Analysis ("MD&A"). This letter of transmittal is designed to complement MD&A and should be read in conjunction with the audit. The Upper Pine River Fire Protection District's MD&A can be found immediately following the report of the independent auditors.

Profile of the District

Upper Pine River Fire Protection District was chartered September 20, 1974 and confirmed in an election on November 19th, 1974 through merger of the Vallecito Fire Department and the Bayfield Volunteer Fire Departments. The Forest Lake Metro District Fire Department merged into the District May 3rd, 1988. During the 2006 calendar year, the District transitioned from a volunteer to a paid fire department. The

Upper Pine River Fire Protection District Phone: 970 884-9508

515 Sower Drive, Bayfield, CO | Fax: 970 884-2444

District provides fire suppression (structural, wildland and vehicle), advanced life support emergency medical service/ambulance service to include patient transport, technical rescue (water, ice, low and high angle rope, confined space, vehicle extrication), fire prevention, fire code enforcement, public education, fuels mitigation and hazardous material and disaster response. The Upper Pine River Fire Protection District incorporates nine response areas. The District's main population resides in three suburban density response zones: the Town of Bayfield, the north Vallecito Lake recreation area and the Forest Lakes Metro District, the largest residential subdivision in La Plata County.

The District is accredited for EMS operations through the Committee on Accreditation of Ambulance Services and is the smallest agency in the United States and the only fire-based organization in the State of Colorado to attain this accreditation. It is a District that responds to all hazards with a focus on customer service.

These services are provided to a fulltime population of approximately 15,000 in 285 square miles of eastern La Plata County and Western Archuleta County in southwest Colorado. The District sees a seasonal increase for the summer of up to 30,000 filling vacation homes and campgrounds at Lake Vallecito. The District also has completed annexation of several large ranches in Western Archuleta County along Highway 160 that are within the 5 mile insurance service rating of UPRFPD Station 8 to afford homeowners better rates on their property insurance. The District is funded primarily by property taxes, ambulance revenue, Federal and State grants, wild fire deployments and donations from Corporations and private citizens.

Upper Pine River Fire Protection District is governed by a five-member Board elected to four year terms. The governing Board has fiduciary responsibilities set forth in the IGA. The Board is responsible for hiring the Chief of the Department. The Chief is responsible for carrying out the policies of the Board and for the leadership and supervision of the day-to-day operations of the District.

The annual budget and budget process serves as the foundation for the Upper Pine River Fire Protection District's financial planning and control. Justified budget requests and prioritization of budget items are processed in the District's strategic planning meeting in September of each year. The District Board of Directors holds a public hearing and adopts its final budget no later than December 31st each year.

Appropriations for the budget are adopted on a total fund basis. The Board of Directors may make additional appropriations during the budget year for expenditures required, but not in excess of the amount of actual revenues exceeding budgeted revenues and un-appropriated surplus for the fund. The Chief may transfer any unencumbered appropriation balance or a portion thereof from one classification of expenditure to another within the budget in order to carry out the goals and objectives of the Board of Directors and the District. The District holds reserves in accordance with an annual operating budget with the State of Colorado for potential wildland fire incidents and disasters.

The District staffs three fire stations 24/7 and one station from 8-5 in the summer with seasonal wildland firefighters. The District operates three ambulances front line and strives to meet the NFPA 1720 Standard for the Organization and Deployment of Fire Suppression Operations, Emergency Medical Operations, and Special Operations to the Public by Career Fire Departments.

Factors Affecting Financial Condition

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective, the specific environment within which the Upper Pine River Fire Protection District operates. The following is a recap of the economic factors impacting the District.

Local Economy

General: The Pine River Valley geographic area is located in the southwestern part of Colorado in the eastern part of La Plata County. The Town of Bayfield, Town of Ignacio and City of Durango make up the Durango "Micropolitan" Area. The local economy suffered greatly due to COVID-19. The tourism and travel industry were severely handicapped by restrictions in restaurants and gatherings. However, the four corners and Durango area had the highest hotel occupancy rates of any Colorado County in 2020. In 2019 the county had an unemployment rate of 2.3% and due to COVID the unemployment rate skyrocketed to 6.8%. In La Plata County, significant increases in housing starts and home sales occurred in 2020 as people migrated from the cities to a more rural area. There continues to be a net migration into LaPlata County. The median housing price jumped from \$399,000 to \$450,000 in 2020. This was a 12.8% increase in average price from 2019. The average 2019 Bayfield per capita income was \$29,789 with mean household income at \$61,610 above; national median income. The 2020 livable wage in Bayfield remained the same at \$12.32 for an adult and \$31.49 for a family of four. The most recent government service average wage (2017) in LaPlata County is \$57,017. This places Upper Pine in the medium range for annual wages.

La Plata County is an ideal location for entrepreneurs and innovative businesses that want to grow and succeed. LaPlata County and the Town of Bayfield were successful in getting COVID relief money to assist area businesses. A shortage of highly skilled workers continues along with a shortage of industrial property. Few other communities in the Rocky Mountains can offer businesses the resources that La Plata County can:

- Three colleges- Fort Lewis College, a four year liberal arts college with a census of approximately 4,000 students, San Juan College in Farmington which provides a variety of technical and liberal arts degrees and Pueblo Community College which provides an educated and skilled workforce.
- Customized workforce training to help your employees keep up with technology and new ideas
- A vibrant and growing regional airport with direct service to major international gateways such as Dallas, Houston, Los Angeles, Denver, and Phoenix.
- High speed internet and 4G wireless service capable of serving cloud technology, high-capacity data transfers, and distributed workforce and operations
- Low property taxes and low employee turnover, which reduce your ongoing operating costs

Fort Lewis College Department of Economics believes that Durango's present economy is primarily based on tourism, now generating approximately 28% of all activity in La Plata County. Oil and gas suffered in 2020 as stricter regulation on new gas wells by the State of Colorado and LaPlata County decreased the revenue. A continued change to the residential assessment rates due to the Colorado Gallagher amendment being removed from the Colorado Constitution continues to generate lower tax revenue for LaPlata area governments. In response to this unstable budget formula the fire District has "De-Bruced" and "De-Gallagherized" in a successful voter initiative in 2018 that took effect in 2019 separating the

Upper Pine River Fire Protection District | Phone: 970 884-9508

515 Sower Drive, Bayfield, CO | Fax: 970 884-2444

district's finances from fluctuations on the Front Range and the Denver metro area. The fire District anticipates a voter initiative to remove the 2024 sunset clause in the mill levy increase passed in 2014.

The Town of Bayfield:

The Town of Bayfield is a statutory Town located in La Plata County within the Upper Pine River Fire Protection District. The town sits at an elevation of about 6900 feet, in the beautiful Pine River Valley, with spectacular vistas in all directions. The town is a bedroom community to the Durango "Micropolitan" area offering more economical, lower density, and ranch style living. The average home price is \$320,900 as compared to Durango at \$590,000 up 5.5% in 2020. Bayfield and the 20 minutes driving radius have a median household income of \$61,610 and per capita income of \$29,789, both above the national averages.

Bayfield is home to approximately 2,600 residents within the town and another 12,528 in the surrounding area the fire District serves. Bayfield acts as the commercial and cultural center for eastern La Plata County. The anchor business establishments are Lewis True Value Hardware, Southwest Agriculture Supply, Riverside RV Park and Gosney, LLC. Bayfield prides itself on our small town atmosphere and long-standing sense of community offering a nostalgic 4th of July Parade and an intact main street commerce area known as Mill Street. The Town of Bayfield was incorporated in 1906 when the Bay family and the Schiller family each donated land to create a supply Town near the Pine River. Bayfield was named after Mr. William Bay when he won a coin toss between himself and Mr. Schiller. Had the toss gone the other way, it is said the Town would have been named "Schillerville".

Modern-day Bayfield residents enjoy an ideal four-season climate that averages some 300 days of sunshine every year, together with moderate temperatures and low humidity, year-round. This ideal recreational climate promotes all sorts of outdoor family activities where any type of enthusiast can find what they're looking for. Whether hiking or biking, hunting or fishing, winter skiing or summer water sports, or exploring the cultural histories of Native American ruins and early Pioneer life, all are available within a short drive, and in almost any direction. The town lies on US Highway 160 which is the main southern transport corridor between the major metropolitan centers in Denver, Pueblo and Colorado Springs. The town is strategically located between Mesa Verde and Great Sand Dunes National Park. For train enthusiasts it is between two of the most visited tourist railroads; the Durango Silverton Narrow Gauge Railroad and the Cumbres and Toltec Railroad.

Bayfield has an excellent school district and did not shut their doors during COVID. The Bayfield School District has long been recognized as one of Colorado's finest. Bayfield High School was one of three high schools in the state to receive a Colorado Governor's Distinguished Improvement Award in 2019. In 2019 the school District completed construction of a new elementary school and improvements to the existing primary school. The library was named the Best Small-town Library in American in 2013. Bayfield also boasts a quaint downtown known as Mill Street that has ball fields for youth and adult sports along with the ever-popular Bayfield Heritage Days held each September.

The Town of Bayfield is serviced by Upper Pine River Fire Station 1 and residents fund the District with a property tax mill levy. Real estate values are increasing within the area and there were numerous new housing starts in 2019 and over 40 new home sites are under construction in a subdivision called Mesa

Upper Pine River Fire Protection District Phone: 970 884-9508

515 Sower Drive, Bayfield, CO | Fax: 970 884-2444

Meadows and the Dove Ranch subdivision was built out in 2020. Housing prices are favorable due to low supply and higher price in Durango. Many of the residents in Bayfield work in the oil and gas industry, public safety, or health care. A significant number of new homes were constructed in Bayfield in 2020 with new businesses opening amid the pandemic.

Vallecito Lake:

Vallecito Lake was strongly impacted by COVID with several of the area restaurants suffering due to lack of customers and staff. Due to COVID, the area did not see an increase in fall revenue typically brought in by hunters. There was a significant uptick in the use of campgrounds and gateways into Federal lands that border Vallecito which resulted in a very good year for provisions and grocery stores. Vallecito Lake is one of the largest and most beautiful bodies of water in Colorado. Vallecito, Spanish for "Little Valley", and ancestral home to many of Colorado's Ute Indians, became the name of the sparkling waters of the lake it surrounded. Located in the Southwestern part of the state just 18 miles from Durango, Vallecito provides a perfect base for enjoying the Four Corners area and its many wonders. The usual inflex if Texan and Oklahomans did not occur this year due to COVID. The Vallecito Lake is serviced by Upper Pine River Fire Station 4.

Forest Lakes Metro District:

Forest Lakes is the largest subdivision in southwestern Colorado. This community is located in La Plata County, Colorado and covers 1,865 acres with 1,600 parcels and 764 structures. Forest Lakes is a remote rural community nestled in the mountains of La Plata County, north of Bayfield, Colorado. The community borders BLM and state lands on the north, USFS lands to the east, and private lands to the south. Forest Lakes is home to about 1,800 residents with 75 percent year-round residents and the remainder residing in Forest Lakes seasonally, primarily during the summer months. Many residents commute to Bayfield, Ignacio, and Durango for work, and many are retired. Forest Lakes is covered by Upper Pine River Fire Station 5 with full time staff.

Long-term Financial Planning:

The Upper Pine River Fire Protection District Board of Directors developed a Strategic Plan in 2012 to create sustainability and bring an innovative service delivery model to the fire District. As the District has grown or evolved from a volunteer department, sophistication of accounting standard practices reflective of government accounting have been initiated. As part of projecting financial needs, a strategic planning process has been implemented. The District has been very successful in grant acquisitions that have allowed for accelerated increases in the reserve fund to a million dollars striving for a restricted reserve of 33% of the annual operating expenses. The District completed a revised and updated service plan in 2020.

The District operates with certain fees for service events and collects ambulance revenue, response fees and the hazardous materials fees from users of this particular service delivery by the fire District. The District has implemented partnerships and business models to use surplus or excess resources within the District to generate revenue for the fire District. The District has recently purchased equipment that is in high demand for regional wildfire assignments and deployed a business model structuring short term lease for three years or less leaving the remaining life span of the vehicles to generate income on wildland fires. To ensure efficiencies and provide for a long-term vehicle replacement plan, the District

Upper Pine River Fire Protection District Phone: 970 884-9508

515 Sower Drive, Bayfield, CO | Fax: 970 884-2444

has begun to sequester monies for replacement of the fleet and physical plant on an appropriate depreciation schedule to ensure timely and cost effective replace without incurring additional bond initiatives. Surplus vehicles are being sold and the fleet is being right sized for efficiency of operations and reduced maintenance cost. Grants for a new ambulance were used in 2020 covering half the cost. Additional grants for a type 3 fire engine were from the Colorado Department of Local Affairs.

The District retired long term lease/purchase agreements for the administration building and equipment of approximately \$800,000. Excess revenues were moved into the fund balance with the idea that they would be available to fund operations when revenues declined. Austerity measures have continued through 2020 to maintain reserve funds to \$1 million.

Awards and Acknowledgements:

The District received two State awards one for its excellence in pediatric care from the Colorado Children's Hospital and an award from the C.A.R.E's program which tracts Cardiac Arrest. The District achieved a 100% cardiac arrest save rate in 2020.

Upper Pine River Fire Protection District received The Government Finance Officers Association of the United States and Canada (GFOA) Certificate of Achievement for Excellence in Financial Reporting for its comprehensive annual financial report for the fiscal year ended December 31, 2019. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

We would like to express our appreciation to Rubin Brown, LLP; the firm that serves as the District's external auditors. The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated service and assistance provided by our accountant, Mickey Ramsey, CPA.

I would like to recognize the District's Board of Directors for their support for the District, its fiscal responsibility and the highest standards of professionalism in the management of the District's finances. Also, to the citizens and stakeholders of the Upper Pine River Fire Protection District for entrusting the judicial use of their tax dollars for the greater good of the community and our corporate donors for their generosity and support. Lastly, to the emergency responders and support staff that brings a level of excellence to rural fire and EMS services delivered in the Pine River Valley during a National pandemic.

Respectfully submitted,

Bruce Evans, MPA, NREMT-P

Management's Discussion and Analysis

As management of Upper Pine River Fire Protection District (the "District"), we offer readers of the District's financial statements this narrative overview and analysis of the financial activities of the District for the fiscal year ended December 31, 2020.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements are composed of three components:

- 1) Government-wide financial statements;
- 2) Fund financial statements;
- 3) Notes to the financial statements.

This report also contains other supplementary information in addition to the basic financial statements themselves. Comparative data is presented when available.

Financial Highlights

- 1. The District's net position at the end of 2020 is \$5,439,198 compared to \$4,803,553 at the end of 2019.
- 2. Total revenues for the year ended December 31, 2020 were \$5,327,572 compared to total revenues of \$4,362,163 in 2019; an increase of \$965,409 due to a substantial increase in wildland firefighting and capital grants.
- 3. The District made use of grant monies awarded from State and Federal funding sources in the amount of \$539,394.

Government-wide financial statements

The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business. The governmental activity of the District is primarily providing fire protection service for the Town of Bayfield, the Upper Pine River and Upper Florida River Valleys.

The Statement of Net Assets presents information on all the District's assets, liabilities, deferred outflows and deferred inflows with the difference between the two reported as net assets. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The Statement of Activities presents information showing how the government's net assets changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods. (e.g., earned but not used vacation leave).

The government-wide financial statements can be found on pages 14 and 15 of this report.

Fund financial statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The District had two funds in 2020, the General Fund and Debt Service Funds, which are governmental funds.

Governmental funds

Governmental funds are used to account for essentially the same function reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of expendable resources, as well as on balances of expendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds are more narrow than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. A reconciliation of the fund balance as reported in the governmental funds to the net change in fund balance to the change in net assets has been provided to facilitate the comparison between governmental funds and governmental activities.

The District adopts an annual appropriated budget for its General and Debt Service Funds. A budgetary comparison statement has been provided for these funds to demonstrate compliance with this budget.

The governmental fund financial statements are presented on pages 16 through 19 of this report.

Notes to the financial statements

The notes provided additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 20 through 48 of this report.

Statement of Net Position

The following is a condensed comparative summary of the District's net position at December 31:

	<u>2020</u>	<u>2019</u>
Current and other Assets Capital Assets Total Assets	\$ 4,350,268 \$ 5,141,398 \$ 9,491,666	\$ 4,837,767 \$ 5,136,123 \$ 9,973,890
Deferred Outflows of Resources	\$ 1,003,753	\$ 1,201,434
Current Liabilities Long Term liabilities Total Liabilities	\$ 661,576 <u>\$ 1,254,275</u> \$ 1,915,851	\$ 1,004,673 <u>\$ 2,277,473</u> \$ 3,282,146
Deferred Inflows of Resources	\$ 3,140,370	\$ 3,089,625
Net Investment in capital assets Restricted Unrestricted	\$ 3,722,745 \$ 203,833 \$ 1,512,620	\$ 2,607,510 \$ 977,125 \$ 1,218,918
Total net position	\$ 5,439,198	\$ 4,803,553

Statement of Activities

The statement of activities reflects the cost of operation and the charges for services and receipt of grants offsetting those services. The following detail reflects the total cost of services supported by operating revenues and property taxes, as well as other general revenues, resulting in the overall change in net assets for the fiscal years 2020 and 2019.

Following is a condensed comparative summary of the District's revenues and expenses for the year ended December 31:

Primary Government		<u>Expenses</u>	Operating Charges Grants and for Services Contributions		Charges Grants		Re Ch	et (Expense) evenue and nanges in et Assets
Governmental Activities: Public Safety Interest	2020 2019 2020 2019	\$4,671,637 \$4,179,341 \$90,290 \$105,666		255,178 215,084	\$ \$	1,621,725 658,932	\$ \$	(2,794,734) (3,305,325) (90,290) (105,666)

NET POSITION -	- Ending	<u>\$ 5,439,1</u>	<u>98</u>		<u>\$</u>	4,803,553		

Financial Analysis

In 2020 our property tax revenues stabilized from the prior year due to an increase in residential assessments and new construction. Fire district management was alerted by the Assessor's office that oil and gas values would see declines starting in fiscal 2012. In preparation for the projected decline the district committed a majority of the excess revenue from 2010 to reserves, did not fill several open administrative positions, froze wages and reduced spending where appropriate without reducing services.

The District supplemented property tax increases with grant monies received including \$90,000 for capital projects, \$65,000 for staffing and \$86,000 for reimbursement of medical expenses. The wildland fire program continued to have a positive impact on the finances of the District as serving as a cooperator to local state and national fires provided the district with **\$894,000** in additional revenues. These additional revenues allowed the District to increase services to national standards and stabilize the financial positions and cash reserves of the District.

iii

Governmental Funds

The focus of the District's governmental funds is to provide information on near-term inflows, outflows, and balances of expendable resources. Such information is useful in assessing the District's financing requirements.

At the end of the current fiscal, the District's governmental funds reported an ending fund balance of \$1,003,950 in the general fund and an ending funding balance of \$79,649, in the debt service fund. Reserved fund balance of \$124,184 is not available for new spending because it has been reserved by TABOR.

Capital Assets

The Districts investment in capital assets for its governmental activities as of December 31, 2020 amounted to **\$5,141,398** (net of accumulated depreciation). This investment in capital assets includes, land, buildings, equipment and vehicles. Additional information can be found in Note 5 to the financial statements.

Long-term Debts

At the end of the year the District had long-term debt outstanding of \$1,748,787 comprised of series 2013 G.O. Bonds and compensated absences. Additional information on the District's debt can be found in Note 6 of the financial statements. In 2013, the 2004 General Obligation Bonds were refunded with the 2013 General Obligation Bonds. The new bonds have an interest rate of 2.67%, compared to a maximum rate of 5.00% with old bonds. The maturity date of the new bonds is the same date as the old bonds. In 2020, the District retired the 2014 Lease Refunding Bonds early.

Budget Analysis

The Fire District continues to use best practices in managing the finances and assets of the district. We continue to seek opportunities to enhance our revenue stream through aggressively pursuing grants and participation in revenue generating functions such as response to wild land fires. These opportunities continue to enhance our capabilities and service delivery. In 2020, the general fund realized gross revenues of **\$4,916,454**. We continue to recover direct costs of personnel, fuel as well as the additional income from rental rates of our equipment.

Our EMS billing and revenues were over budget in 2020. The amount collected helps fund the EMS Operations which can be described as vehicles, fuel, medical supplies, insurance and training.

During the year, the original operating budget was amended to account for differences in anticipated revenues and expenses and actual revenue and expenses. Significant variances were reported for the wildland fire income account. Revenue was increased 18% over the original budget and excess revenue over expenses was increased by \$163.000.

Economic Factors, Trends and Future Plans

2020 tax revenue increased slightly due to increased residential values and new home starts. As supply drops and the buildable land in the central part of the county becomes expensive, continued increases are anticipated in residential property values in the District with the next property valuation.

Buildable lots in the eastern La Plata County are now at a premium which is expected to send property values up significantly as inventory declines. Three large parcels that could result in as many as 300 additional homes are possible in Mesa Meadows, Homestead and a recently acquired parcel on the east side of Bayfield that has an existing master plan. As inventory decreases and pricing elevates it is anticipated that growth in housing will shift to the eastern side of the county in Bayfield and Forrest Lakes.

Factors that have allowed us to continue to fully operate with no reduction in service have been our continued response to national wildfires. That program brought \$894,000 in gross revenue to the district in 2020. We were also awarded approximately \$66,000 from a FEMA grant for staffing.

Request for information

This financial report is designed to provide a general overview of the District's finances for all those with and interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to:

CERTIFIED PUBLIC ACCOUNTANTS & BUSINESS CONSULTANTS

Independent Auditors' Report

Board of Directors Upper Pine River Fire Protection District Bayfield, Colorado

Report On The Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund and the aggregate remaining fund information of Upper Pine River Fire Protection District (the District) as of and for the year ended December 31, 2020, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility For The Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund and the aggregate remaining fund information of the District as of December 31, 2020 and the respective changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages i through v, the budgetary comparison schedule, schedules of the District's proportionate share of the net pension assets (liabilities), schedules of the District's contributions to the pension plans and notes to required supplementary information on pages 49 through 55 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The introductory section, individual fund budgetary comparison schedule and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The individual fund budgetary comparison schedule is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the individual fund budgetary comparison schedule is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES For The Year Ended December 31, 2020

Net Change In Fund Balances - Total Governmental Funds	\$	(452,114)
Amounts reported for governmental activities in the statement of activities are different because: Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is capitalized and depreciated over their estimated useful lives. Capital outlay	\$ 392,515	
Depreciation	(387,240)	$5,\!275$
Deferred charges on advance refundings are expenditures in the governmental funds, but these amounts are shown as deferred		
outflows of resources on the statement of net position.		(32,437)
Dension honofit does not provide compant financial resources and		
Pension benefit does not provide current financial resources and, therefore, is not reported as income in governmental funds.		27,752
The issuance of long-term debt (i.e., bonds and leases) provides current financial resources to governmental funds, while the repayment of principle of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts and similar items when debt is first issued, whereas these amounts are amortized in the statement of activities. The amount is the net effect of these differences in the treatment of long-term debt and related items. Compensated absences Accrued interest payable Bond principal payments	(56,764) 1,536 342,110	
Capital leases principal payments	800,287	1,087,169
Change In Net Position Of Governmental Activities	\$	635,645

NOTES TO FINANCIAL STATEMENTS December 31, 2020

1. Description Of Reporting Entity

The Upper Pine River Fire Protection District (the District) was established on November 26, 1974 as a special district as defined by Colorado State Statutes. The District was formed for the purpose of providing fire protection services for the Town of Bayfield and the Upper Pine River and Upper Florida River valleys. The District has its own elected governing board (the Board) and levies a tax on the property within the District for operations.

The District follows U.S. generally accepted accounting principles (GAAP), including Governmental Accounting Standards Board (GASB) accounting pronouncements that provide guidance for determining which governmental activities, organizations and functions should be included within the financial reporting entity. The accompanying comprehensive annual financial report includes the financial activities of the District as the primary government. The District formed the Upper Pine River Fire Protection District Financial Corporation (the Corporation) on November 10, 2014 for the purpose of acquiring leasehold interest in certain property and for leasing the property to the District, and to serve such other purposes as set forth in the Colorado Revised Nonprofit Corporation Act. The District appoints the Board of Directors of the Corporation. The Corporation is included as a blended component unit in the District's financial statements.

The District is not financially accountable for any other organization, nor is the District a component unit of any other primary governmental entity.

2. Summary Of Significant Accounting Policies

Basis Of Presentation

The District's basic financial statements consist of government-wide statements, including a statement of net position and a statement of activities. The government-wide financial statements report information for the District as a whole. Individual funds are not displayed at this financial reporting level.

Notes To Financial Statements (Continued)

The statement of net position presents the financial position of the governmental activities of the District.

The statement of activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. Direct expenses are those that are specifically associated with a function and, therefore, clearly identifiable to that particular function. The District does not allocate indirect expenses to functions in the statement of activities.

The statement of activities reports the expenses of a given function offset by program revenues directly connected with the functional program. A function is an assembly of similar activities and may include portions of a fund or summarize more than one fund to capture the expenses and program revenues associated with a distinct functional activity. Program revenues include: (1) charges for services, which report fees and other charges to users of the District's services; (2) operating grants and contributions, which finance annual operating activities, including restricted investment income and (3) capital grants and contributions, which fund the acquisition, construction or rehabilitation of capital assets. These revenues are subject to externally imposed restrictions to these program uses. For identifying to which function program revenue pertains, the determining factor for charges for services is which function generates the revenue. For grants and contributions, the determining factor is to which function the revenues are restricted.

Taxes and other revenue sources not included with program revenues are reported as general revenues of the District. The comparison of direct expenses with program revenues identifies the extent to which each governmental function is self-financing or draws from the general revenues of the District.

Fund financial statements are designed to present financial information of the District at a more detailed level. Fund financial statements are provided for the District's governmental funds.

Fund Accounting

The accounts of the District are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, deferred outflows of resources, liabilities, deferred inflows of resources, fund balance, revenues and expenditures, as appropriate. The District reports only governmental funds.

Notes To Financial Statements (Continued)

Governmental Funds

Governmental funds are those through which most governmental functions typically are financed. Governmental fund reporting focuses on the sources, uses and balances of current financial resources. Expendable assets are assigned to the various governmental funds according to the purposes for which they may or must be used. Fund liabilities are assigned to the fund from which they will be liquidated. The District reports the difference between governmental fund assets and deferred outflows of resources and liabilities and deferred inflows of resources as fund balance. The following are the District's major governmental funds:

General Fund - The General Fund is the general operating fund of the District. It is used to account for all financial resources except those required to be accounted for in another fund.

Debt Service Fund - The Debt Service Fund is used to account for the accumulation of resources for, and the payment of, long-term obligation principal, interest and related costs.

Measurement Focus And Basis Of Accounting

The government-wide financial statements are prepared using the economic resources measurement focus under the accrual basis of accounting. All assets, deferred outflows of resources, liabilities and deferred inflows of resources are included on the statement of net position, and the statement of activities reports revenues and expenses.

All governmental funds are reported using the current financial resources measurement focus under the modified accrual basis of accounting. Within this measurement focus, only current assets, current liabilities and certain deferred outflows and inflows of resources generally are included on the balance sheet. The statement of revenues, expenditures and changes in fund balances reports the sources (i.e., revenues and other financing sources) and uses (i.e., expenditures and other financing uses) of current financial resources. This approach differs from the manner in which the governmental activities of the government-wide financial statements are prepared. Governmental fund financial statements, therefore, include a reconciliation with brief explanations to better identify the relationship between the government-wide statements and the governmental fund statements.

Notes To Financial Statements (Continued)

Differences in the accrual and the modified accrual basis of accounting arise in the recognition of revenue, the recording of a deferred outflow of resources and in the presentation of expenses versus expenditures. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, revenues are considered to be available if they are collected within 60 days of the end of the current fiscal year. Property taxes, specific ownership taxes, grants and intergovernmental receipts and medical billings associated with the current fiscal period are susceptible to accrual and so have been recognized as revenues in the current fiscal period. Expenditures are generally recognized under the modified accrual basis of accounting when the related fund liability is incurred.

Use Of Estimates

The preparation of financial statements, in conformity with GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Budgets And Budgetary Accounting

The Board follows these procedures in establishing the budgetary data reflected in the financial statements:

- 1. In accordance with the state statutes, prior to October 15, the Fire Chief submits to the Board a proposed operating budget for the calendar year commencing the following January 1. The operating budget includes proposed expenditures and the means of financing them for the upcoming year, along with estimates for the current year and actual data for the two preceding years. State statutes require a more detailed line item budget be submitted in summary form. In addition, more detailed line item budgets are included for administrative control.
- 2. Public hearings are conducted to obtain taxpayer comment.
- 3. Prior to December 31, the budget is legally enacted through passage of a resolution.
- 4. Budgets for the governmental funds are adopted on a basis consistent with GAAP.

Notes To Financial Statements (Continued)

- 5. Appropriations lapse at the end of each calendar year.
- 6. The Board may authorize supplemental appropriations during the year.

During 2020, expenditures in the General Fund exceeded appropriations by \$698,570, which may be a violation of Colorado Revised Statutes.

Cash, Cash Equivalents And Investments

The District's deposits include amounts that are readily convertible to known amounts of cash, are not subject to significant risk from changes in interest rates and have a maturity of three months or less from the date of acquisition. Deposits include cash in checking accounts and certificates of deposits.

The District's investment policy, in accordance with Colorado law, authorizes investment in obligations of the U.S. Treasury, the State of Colorado, Colorado counties and school districts, repurchase agreements, financial institutions and local government investment pools. State statutes prohibit investments with a stated maturity date greater than five years, unless allowed by District Charter.

Investments are measured at fair value in accordance with GASB Statement No. 72, Fair Value Measurement and Application, and GASB Statement No. 79, Certain External Investment Pools and Pool Participants.

Interfund Balances

Exchange transactions between funds are reported as revenues in the seller funds and as expenditures/expenses in the purchaser funds. Flows of cash or goods from one fund to another without a requirement for repayment are reported as interfund transfers. Interfund transfers are reported as other financing sources (uses) in governmental funds. Repayments from funds responsible for particular expenditures/expenses to the funds that initially paid for them are not presented on the government-wide financial statements.

Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in the financial statements. Prepaid items of the District consist of expenditures related to insurance. Prepaid items are valued at cost and are recorded as expenditures in governmental funds when purchased.

Notes To Financial Statements (Continued)

Property Taxes

Annual property taxes are levied and certified by the County Treasurer in December of the current year. On January 1 of the following year, the County Treasurer bills the property owners, thus establishing an enforceable lien on the property. The County Treasurer collects the property taxes and remits the collections to the District, net of a collection fee, on a monthly basis during the year that follows the levy. Since property taxes are levied in December for the next calendar year's operations, the total levy is reported as taxes receivable and a deferred inflow.

Capital Assets

Capital assets, which include property, plant and equipment, are reported in the applicable governmental column in the government-wide financial statements. Capital assets are defined by the District as assets with an initial individual cost of \$5,000 or more and an estimated useful life of more than one year. Capital assets are recorded at historical cost or estimated historical cost if actual historical cost is not available.

Donated capital assets are recorded at their acquisition value on the date donated.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the life of the asset are not capitalized. Improvements are capitalized and depreciated over the remaining useful lives of the related capital assets, as applicable. Property, plant and equipment of the District are depreciated using the straight-line method over the following estimated useful lives:

	Years
Buildings and improvements	20 - 40
Equipment	5 - 10
Vehicles	10 - 15

Notes To Financial Statements (Continued)

Compensated Absences

Regularly employed, full-time employees of the District accrue vacation time up to a maximum of 576 hours. Employees are considered full-time if they are regularly employed for at least 32 hours per week. Vacation accruals are based on years of service as follows:

1 - 12 months of service	$5~\mathrm{days}$
2 - 5 years of service	10 days
6 - 10 years of service	15 days
11 - 20 years of service	24 days

Fire suppression and emergency medical employees assigned to fire suppression duty and working 24-hour shifts accrue vacation time annually, after completing 6 months of service at the following rate:

1 - 12 months of service	96 hours/year
13 - 59 months of service	144 hours/year
60+ months of service	192 hours/year

Employees also accrue sick time up to a maximum of 750 hours. Employees are eligible for payment of sick time at the following rate:

0 to 5 years of service	0% paid
6 to 15 years of service	50% paid
16+ years of service	100% paid

Vacation and sick leave benefits are recorded when earned, and a liability is recorded on the government-wide financial statements. For governmental funds purposes, a liability for these amounts is reported only if the amount is due at fiscal year end.

Long-Term Liabilities

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities. Debt premiums and discounts are amortized over the life of the bonds using the effective interest method.

In the fund financial statements, governmental fund types recognize debt premiums and discounts during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources, while discounts on debt issuances are reported as other financing uses. Issuance costs are reported as debt service expenditures.

Notes To Financial Statements (Continued)

Deferred Outflows And Deferred Inflows Of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/expenditure) until that time. The deferred charge on advanced refunding is recorded as a deferred outflow. A deferred charge on advanced refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. The District has also recognized deferred outflows of resources in the government-wide financial statements in accordance with pension reporting presentation requirements.

In addition to liabilities, the statement of net position and governmental funds balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position or fund balance that applies to a future period(s) and so will *not* be recognized as an inflow of resources (revenue) until that time. Property tax revenue that is related to a future period is recorded as a deferred inflow. These amounts are deferred and will be recognized as an inflow of resources in the period that the amounts become available, at both the governmental fund level and in the period the taxes are levied at the government-wide reporting level. The District has also recognized deferred inflows of resources in the government-wide financial statements in accordance with pension reporting presentation requirements.

Fund Balance And Net Position

In the fund financial statements, governmental funds report the following classifications of fund balance:

Nonspendable - includes amounts that cannot be spent because they are either not spendable in form or because they will not convert to cash soon enough to affect the current period, and resources that must be maintained intact pursuant to legal or contractual requirements

Restricted - includes amounts restricted by external sources (creditors, laws of other governments, etc.) or by constitutional provision or enabling legislation

Notes To Financial Statements (Continued)

Committed - includes amounts that can only be used for specific purposes. Committed fund balance is reported pursuant to resolutions passed by the Board, the District's highest level of decision-making authority. Commitments may be modified or rescinded only through resolutions approved by the Board.

Assigned - includes amounts the District intends to use for a specific purpose, but do not meet the definition of restricted or committed fund balance. The District's adopted policy does not include a specific person designated to assign fund balances.

Unassigned - includes amounts that have not been assigned to other funds or restricted, committed or assigned to a specific purpose within the General Fund

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance are available, the District considers restricted funds to have been spent first. Although not included in a formal policy, the District considers decreases to fund balance to first reduce committed, then assigned and then unassigned balances, in that order.

Net position represents the difference between assets, deferred outflows of resources, liabilities and deferred inflows of resources. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition or construction of improvements on those assets, excluding unspent bond proceeds. Net position is reported as restricted when there are limitations imposed on its use, either through the enabling legislation adopted by the District or through external restrictions imposed by creditors, grantors, laws or regulations of other governments.

Pensions

For purposes of measuring the net pension asset, deferred outflows of resources and deferred inflows of resources related to pensions and pension benefit, information about the fiduciary net position of the Statewide Defined Benefit Pension Plan (SWDBP) and the Statewide Hybrid Defined Benefit Component Pension Plan (SWHDBP) and additions to/deductions from SWDBP's and SWHDBP's fiduciary net position have been determined on the same basis as they are reported by the plans. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value. The general fund is used to liquidate any pension liabilities.

Notes To Financial Statements (Continued)

3. Cash, Cash Equivalents And Investments

Deposits

The Colorado Public Deposit Protection Act (PDPA) requires that all units of local government deposit cash in eligible public depositories. Eligibility is determined by state regulators. Amounts on deposit in excess of federal insurance levels must be collateralized. The eligible collateral is specified by PDPA. PDPA allows the institution to create a single collateral pool for all public funds. The pool is to be maintained by another institution or held in trust for all the uninsured public deposits as a group. The State Regulatory Commission for banks is required by statute to monitor the naming of eligible depositories and reporting of the uninsured deposits and assets maintained in the collateral pools.

Federal Deposit Insurance Corporation coverage for government accounts is \$250,000 per official custodian. At December 31, 2020, the District's cash deposits had a book balance of \$250,240 and a corresponding bank balance of \$336,431. The difference between the book and bank balances is due to outstanding checks and deposits not yet processed by the banks. Of the bank balance, \$326,454 was covered by federal depository insurance. The remainder of the bank balance was collateralized with securities held by the pledging financial institution and covered by eligible collateral as determined by PDPA.

At December 31, 2020, the District had the following cash and investments:

	Boo	k Balance
Money market funds	\$	728
Cash held with County Treasurer		19,370
Cash on deposit		250,968
Closed-end municipal bond funds		226,174
Total	\$	496,512

Notes To Financial Statements (Continued)

Investments

The District is required to comply with state statutes which specify investment instruments meeting defined rating, maturity and concentration risk criteria in which local governments may invest, which include the following:

- Obligations of the United States and certain U.S. agency securities
- General obligation and revenue bonds of U.S. local government entities
- Bankers' acceptances of certain banks
- Commercial paper
- Certain securities lending agreements
- Written repurchase agreements collateralized by certain authorized securities
- Certain money market funds
- Guaranteed investment contracts
- Local government investment pools

At December 31, 2020, the District had the following investments:

		Investment Maturities								
		(In Years)								
Investment	Rating	Less Than One One To Five				Total				
Investments measured at fair value:										
Money market funds	AAAm	\$	728	\$	— \$	728				
Investments measured at net asset value:										
Closed-end municipal bond funds			_		226,174	226,174				
			•	•						
Total Investments		\$	728	\$	226,174 \$	226,902				

Custodial Credit Risk - Custodial credit risk is the risk that, in the event of a bank failure, the District's deposits may not be returned to it. As of December 31, 2020, the District's deposits were not exposed to custodial credit risk as all deposits were insured by the Federal Deposit Insurance Corporation or collateralized in accordance with PDPA.

Concentration Risk - It is the policy of the District to diversify its use of investment instruments. Investments shall be diversified to avoid incurring unreasonable risks of loss inherent in over-concentration of assets in a specific maturity, a specific issuer or a specific class of securities. The asset allocation in the portfolio should, however, be flexible, depending on the outlook of the economy, the securities market and the District's anticipated cash flow needs.

Notes To Financial Statements (Continued)

Credit Risk - The District's investment policy is to apply the prudent person rule where investments are made as a prudent person would be expected to act. The District's investment policy limits investments in fixed income securities to U.S. Treasury obligations, federal agency securities, federal instrumentality securities, commercial paper, money market funds and the Colorado public investment pools. The investment policy limits investments in commercial paper to be rated in the highest category by at least one nationally recognized rating agency at the time of purchase. Money market funds must be registered as an investment company.

Interest Rate Risk - As a means of limiting its exposure to fair value losses arising from prevailing market interest rates, the District's investment policy states that the District will structure their investment portfolio so that securities mature to meet ongoing operations, and will invest operating funds in primarily short-term securities, money market mutual funds or similar investment pools. The average maturity of the portfolio will be limited.

Fair Value

The District categorizes its fair value measurements within the fair value hierarchy established by GAAP. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The District's investment in the money market fund has a Level 1 fair value measurement as of December 31, 2020.

Closed-end municipal bond funds are measured at net asset value. Fixed income securities are valued using matrix pricing methods which reflect security prices, yields, maturities and ratings, and are supplemented by dealer and exchange quotes. In determining whether market quotations are readily available or fair valuation will be used, various factors will be taken into consideration, such as market closures or suspension of trading in a security.

4. Accounts Receivable

No allowance for uncollectible property taxes has been provided because the County Treasurer is empowered to file liens on properties where delinquencies exist. Accordingly, the District believes any delinquencies will eventually be paid.

Notes To Financial Statements (Continued)

Other receivables include amounts due from wildland fire billings and grants. All receivables are current and, therefore, due within one year. Management believes the other receivables are fully collectible, and therefore, an allowance for doubtful accounts is not recorded.

The District estimates that a portion of its medical billing receivables will be uncollectible, and a reserve for the uncollectible medical billings has been established. This reserve is examined annually and adjusted if appropriate. Medical billings are adjusted for contractual allowances at the time of billing. The allowance at December 31, 2020 is \$94,789.

5. Capital Assets

The following is a summary of changes in capital assets for the year ended December 31, 2020:

		Balance						Balance
	•	January 1,					De	ecember 31,
		2020	A	dditions	\mathbf{L}	eletions		2020
Capital assets not being depreciated:								_
Land	\$	377,753	\$	_	\$	_	\$	377,753
Capital assets being depreciated:								
Building		5,815,947		35,067		_		5,851,014
Equipment		995,764		32,700		_		1,028,464
Vehicles		6,326,055		324,748		183,000		6,467,803
Total		13,137,766		392,515		183,000		13,347,281
Accumulated depreciation for:								
Building		(1,875,797)		(150,883)		_		(2,026,680)
Equipment		(777,096)		(70,515)		_		(847,611)
Vehicles		(5,726,503)		(165,842)		183,000		(5,709,345)
Total		(8,379,396)		(387,240)		183,000		(8,583,636)
Capital Assets Being Depreciated - Net		4,758,370		5,275		_		4,763,645
Capital Assets - Net	\$	5,136,123	\$	5,275	\$		\$	5,141,398

Depreciation expense for the year ended December 31, 2020 was \$387,240 and was charged to public safety.

Notes To Financial Statements (Continued)

6. Long-Term Liabilities

General Obligation Bonds

The District issued \$5,200,000 of General Obligation Bonds, Series 2004. The bonds were issued on June 1, 2004, with interest payments due June 1 and December 1 of each year, commencing December 1, 2005. The bonds mature in various amounts through 2024 and bear interest from 2.4% to 5.0%. The bonds are general obligations of the District. All of the taxable property within the District is subject to the levy of the general ad valorem property tax to pay principal and interest of the bonds.

The bonds were issued to (a) acquire, construct and equip new fire stations; (b) renovate and remodel existing fire stations; (c) acquire fire trucks and general fire equipment and (d) to refinance the 2002 Wells Fargo Bank Equipment and Building lease. Proceeds of the bonds were used to pay the costs of issuance of the bonds.

On December 27, 2013, the District issued General Obligation Refunding Bonds, Series 2013, in the amount of \$3,685,000, with an interest rate of 2.67%. The bonds were issued to advance refund all of the outstanding Series 2004 general obligation bonds. The net proceeds of \$3,623,355 (after payment of \$53,525 in underwriting fees and other issuance costs) were deposited in an irrevocable trust with an escrow agent to provide funds for the future debt service payments on the refunded bonds. As a result, the 2004 bonds are considered defeased and have been removed from the statement of net position.

The refunding of the Series 2004 bonds resulted in a difference between the reacquisition price of the Series 2013 bonds and the carrying amount of the old debt of \$121,269. This difference, reported in the statement of net position as a deferred outflow of resources, is amortized over the new debt's life using the effective interest method.

On November 26, 2014, the District issued Tax-Exempt Direct Purchase Lease Revenue Bonds, Series 2014, in the amount of \$2,600,000, with an interest rate of 2.38%. The bonds were issued to refund prior outstanding 2008 and 2009 capital leases with Pine River Valley Bank and resulted in a deferred loss on refunding of \$75,609 in deferred outflows of resources to be amortized over the life of the debt. The net proceeds of \$2,286,868 (after payment of \$76,097 in underwriting fees and other issuance costs) were used to terminate the 2008 and 2009 leases fully as of November 26, 2014.

Notes To Financial Statements (Continued)

The Series 2014 bonds require that the District meet certain financial covenants. In June 2020, the District's Board of Directors approved accelerated repayment of the debt, which resulted in full repayment during fiscal year 2020.

Year	Principal	Interest	Total
2021	\$ 351,244	\$ 39,042	\$ 390,286
$2022 \\ 2023$	360,622 $370,251$	29,664 $20,035$	390,286 390,286
2024	380,136	10,150	390,286
Total	\$ 1,462,253	\$ 98,891	\$ 1,561,144

The following is a schedule of the changes in long-term debt for 2020:

	J	Balance anuary 1, 2020	Ac	dditions	F	Reductions	Dec	Balance ember 31, 2020	Current Portion
2013 General Obligation Refunding Bonds 2014 Lease Revenue Refunding Bonds	\$	1,804,363 800,287	\$	_	\$	(342,110) (800,287)	\$	1,462,253	\$ 351,244
Total		2,604,650		_		(1,142,397)		1,462,253	351,244
Compensated Absences		229,770		147,149		(90,385)		286,534	143,268
Total Long-Term Liabilities	\$	2,834,420	\$	147,149	\$	(1,232,782)	\$	1,748,787	\$ 494,512

Lease revenue bonds and compensated absence obligations are liquidated through the General Fund and the general obligation refunding bond is liquidated from the Debt Service Fund.

7. Pension Plans

The District maintains the following plans for pension benefits:

- Fire & Police Pensions Association of Colorado (FPPA) SWDBP
- FPPA SWHDBP

Notes To Financial Statements (Continued)

A summary of pension related items as of December 31, 2020 is presented below.

_	N	et Pension Asset	Of	Deferred Outflows Resources	Of I	Deferred Inflows Resources	Benefit (Pension (Expense)
SWDBP SWHDBP	\$	(124,044) (92,939)	\$	865,416 94,737	\$	232,479 21,213	\$	36,013 (8,261)
Total	\$	(216,983)	\$	960,153	\$	253,692	\$	27,752

FPPA Statewide Cost-Sharing Defined Benefit Pension Plan Plan Description

Eligible employees of the District are provided with pensions through SWDBP, a cost-sharing multiple-employer defined benefit pension plan administered by FPPA.

Benefits Provided

SWDBP provides retirement and disability, annual increases and death benefits for members or their beneficiaries. A member is eligible for a normal retirement pension once the member has completed 25 years of credited service and has attained the age of 55. Effective January 1, 2021, a member may also qualify for a normal retirement pension if the member's combined years of service and age equals at lease 80, with a minimum age of 50 (rule of 50).

The annual normal retirement benefit is 2% of the average of the member's highest 3 years' base salary for each year of credited service up to 10 years, plus 2.5% for each year of service thereafter. The benefit earned prior to January 1, 2007 for members of affiliated Social Security employers will be reduced by the amount of Social Security income payable to the member annually. Effective January 1, 2007, members currently covered under Social Security will receive half the benefit when compared to SWDBP. Benefits paid to retired members are evaluated and may be redetermined every October 1. The amount of any increase is at the FPPA Board's discretion and can range from 0% to the higher of 3% or the Consumer Price Index for Urban Wage Earners and Clerical Workers.

Notes To Financial Statements (Continued)

A member is eligible for an early retirement after completion of 30 years of service or attainment of age 50 with at least 5 years of credited service. The early retirement benefit equals the normal retirement benefit reduced on an actuarially equivalent basis. Upon termination, an employee may elect to have member contributions, along with 5% as interest, returned as a lump sum distribution. Alternatively, a member with at least 5 years of accredited service may leave contributions with SWDBP and remain eligible for a retirement pension at age 55 equal to 2% of the member's average highest 3 years' base salary for each year of credited service up to 10 years, plus 2.5% for each year of service thereafter.

Contributions

The plan sets contribution rates at a level that enables all benefits to be fully funded at the retirement date of all members. Through December 31, 2020, contribution rates for the plan are set by state statute. Employer contribution rates can only be amended by state statute. Effective January 1, 2021, contribution rates for employers and members may be increased equally by the FPPA Board of Directors upon approval through an election by both the employers and the members.

Members of the SWDBP and their employers are contributing at the rate of 10.5% and 8%, respectively, of base salary for a total contribution rate of 18.5%. In 2014, the members elected to increase the member contribution rate to the SWDBP beginning in 2015. Members' contribution rates will increase 0.5% annually through 2022 to a total of 12% of base salary. Employer contributions remained at 8% through 2020, but will increase 0.5% annually beginning in 2021 through 2030 to a total of 13% of pensionable earnings.

Contributions from members and employers of departments re-entering the system are established by resolution and approved by FPPA Board of Directors. The re-entry group has a combined contribution rate of 22.5% and 23% of base salary in 2019 and 2020, respectively. It is a local decision as to whether the member or employer pays the additional 4% contribution. The member and employer contribution rates will increase through 2030 as described above for the non-reentering departments. Effective January 1, 2021, re-entry departments may submit a resolution to the FPPA Board of Directors to reduce the additional 4% contribution, to reflect the actual cost of re-entry by department, to the plan for re-entry contributions. Each re-entry department is responsible to remit contributions to the plan in accordance with their most recent FPPA Board of Directors approved resolution.

Notes To Financial Statements (Continued)

The contribution rate for members and employers of affiliated Social Security employers is 5.25% and 4%, respectively, of pensionable earnings for a total contribution rate of 9.25% in 2019 and 9.5% in 2020. Per the 2014 member election, members of the affiliate Social Security group had their required contribution rate increase 0.25% annually beginning in 2015 through 2022 to a total of 6% of pensionable earnings. Employer contributions are 4% in 2019 and 2020. Employer contributions will increase to 0.25% annually beginning in 2021 through 2030 to a total of 6.5% of pensionable earnings.

Employer contributions are recognized by SWDBP in the period in which the compensation becomes payable to the member and the District is statutorily committed to pay the contributions to SWDBP. Employer contributions recognized by SWDBP from the District were \$143,116 for the year ended December 31, 2020.

Pension Asset, Pension Benefit, Deferred Outflows Of Resources And Deferred Inflows Of Resources Related To Pensions

At December 31, 2020, the District reported a net pension asset of (\$124,044) for its proportionate share of the net pension asset. The net pension asset was measured as of December 31, 2019, and the total pension asset was determined by an actuarial valuation as of January 1, 2020. The District's proportion of the net pension asset was based on District contributions to SWDBP for the calendar year 2019 relative to the total contributions of participating employers to SWDBP based upon the January 1, 2019 actuarial valuation.

At December 31, 2019, the District's portion was 0.219329%, which was a decrease of 0.042242% from its proportion measured as of December 31, 2018.

Notes To Financial Statements (Continued)

For the year ended December 31, 2020, the District recognized pension benefit of \$36,013. At December 31, 2020, the District reported deferred outflows of resources and deferred inflows of resources related to SWDBP from the following sources:

Deferred Outflows Of Resources		
Changes of assumptions	\$	419,789
Differences between expected and actual experience		$235,\!534$
Changes in proportionate share		66,977
Contributions subsequent to measurement date		143,116
Total Deferred Outflows Of Resources	\$	865,416
Deferred Inflows Of Resources Difference between projected and actual	\$	105 001
earnings on pension plan investments Differences between expected and actual experience	Φ	$195,001 \\ 2,428$
1		,
Changes in proportionate share		35,050
Total Deferred Inflows Of Resources	\$	232,479

The amount of \$143,116 reported as deferred outflows of resources related to SWDBP, resulting from contributions subsequent to the measurement date, will be recognized as an increase of the net pension asset in the year ended December 31, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to SWDBP will be recognized in pension expense as follows:

For The Year		
Ended December 31	,	
2021	\$	46,057
2022		29,169
2023		92,607
2024		10,324
2025		93,691
Thereafter		217,973
Total	\$	489,821

Notes To Financial Statements (Continued)

Actuarial Assumptions

The actuarial valuations for SWDBP were used to determine the total pension asset and actuarially determined contributions for the fiscal year ending December 31, 2019. The valuation used the following actuarial assumption and other inputs:

	Total Pension Liability	Actuarially Determined Contributions
Valuation date	January 1, 2020	January 1, 2019
Actuarial cost method	Entry age normal	Entry age normal
Amortization method	N/A	Level % payroll, open
Remaining amortization period	N/A	30 years
Actuarial assumptions:		
Investment rate of return*	7.0%	7.0%
Projected salary increases*	4.25% - 11.25%	4.25% - 11.25%
Cost of living adjustments	0.0%	0.0%
* Includes inflation at:	2.5%	2.5%

For determining the total pension asset and actuarially determined contributions, the post-retirement mortality tables for nondisabled retirees uses the 2006 central rates from the RP-2014 Annuitant Mortality Tables projected to 2018 using the MP-2017 projection scales, and the projected prospectively using the ultimate rates of the scale for all years. The pre-retirement off-duty mortality tables are adjusted to 50% of the RP-2014 mortality tables for active employees. The on-duty mortality rate is 0.00015.

At least every five years, FPPA's Board of Directors, in accordance with best practices, reviews its economic and demographic actuarial assumptions. At its July 2018 meeting, the FPPA's Board of Directors reviewed and approved recommended changes to the actuarial assumptions. The recommendations were made by FPPA's actuaries, Gabriel, Roeder, Smith & Co., based upon their analysis of past experience and expectations of the future. The assumption changes were effective for actuarial valuations beginning January 1, 2019. The actuarial assumptions impact actuarial factors for benefit purposes such as purchases of service credit and other benefits were actuarial factors are used.

Notes To Financial Statements (Continued)

The long-term expected rate of return on pension plan investments was determined using a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation (assumed at 2.5%). Best estimates of arithmetic real rates of return for each major asset class included in the Fund's target asset allocation as of December 31, 2019 are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Rate Of Return
01.1.1	22.000/	5 000/
Global equity	38.00%	7.00%
Equity long/short	8.00%	6.00%
Illiquid alternatives	25.00%	9.20%
Fixed income	15.00%	5.20%
Absolute return	8.00%	5.50%
Managed futures	4.00%	5.00%
Cash	2.00%	2.52%
Total	100.00%	

Discount Rate

The discount rate used to measure the total pension asset was 7.0%. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the Board's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, SWDBP fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension asset.

Projected benefit payments are required to be discounted to their actuarial present values using a single discount rate that reflects (1) a long-term expected rate of return on pension plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits) and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the plan's projected fiduciary net position is not sufficient to pay benefits).

Notes To Financial Statements (Continued)

For the purpose of the valuation, the expected rate of return on pension plan investments is 7.0%, the municipal bond rate is 2.75% (based on the weekly rate closest to but not later than the measurement date of the state and local bonds rate from Federal Reserve statistical release (H.15)) and the resulting single discount rate is 7.0%, based upon the plan's fiduciary net position projected to be sufficient to pay benefits.

Sensitivity Of The District's Proportionate Share Of The Net Pension Liability To Changes In The Discount Rate

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 7.0%, as well as what the plan's net pension (asset) liability would be if it were calculated using a single discount rate that is one percent lower (6.0%) or one percent higher (8.0%):

	1	1% Decrease (6.0%)	Current Discount Rate (7.0%)	1% Increase (8.0%)
Proportionate share of the net pension asset (liability)	\$	(752,108) \$	124,044	\$ 850,696

Pension Plan Fiduciary Net Position

Detailed information about SWDBP's fiduciary net position is available in FPPA's comprehensive annual financial report, which can be obtained on FPPA's website at http://www.fppaco.org.

FPPA SWHDBP

Plan Description

Eligible employees of the District are provided with pensions through SWHDBP, a cost-sharing multiple-employer pension plan administered by FPPA. SWHDBP is comprised of two components: defined benefit and money purchase.

Benefits Provided

A member is eligible for a normal retirement pension once the member has completed 25 years of credited service and has attained the age of 55.

The annual normal pension of the Defined Benefit Component is 1.5% of the average of the member's highest three years' base salary for each year of credited service. Benefits paid to retired members of the Defined Benefit Component are evaluated and may be re-determined annually on October 1. The amount of any increase is at the Board's discretion and can range from 0% to 3%.

Notes To Financial Statements (Continued)

A member is eligible for early retirement within the Defined Benefit Component after completion of 30 years of service or attainment of age 50 with at least 5 years of credited service. The early retirement benefit equals the normal retirement benefit reduced on an actuarially equivalent basis. Upon termination, an employee may elect to have member contributions, along with 5% as interest, returned as a lump sum distribution from the defined benefit component. Alternatively, a member with at least 5 years of accredited service may leave contributions with the defined benefit component of the plan and remain eligible for a retirement pension at age 55 equal to 1.5% of the member's average highest 3 years' base salary for each year of credited service.

Contributions

The plan sets contribution rates at a level that enables all benefits to be fully funded at the retirement date of all members. The members of the SWHDBP plan and their employers are currently each contributing at the rate determined by the individual employer; however, the rate for both employer and members must be at least 8% of the member's base salary. The amount allocated to the Defined Benefit Component is set annually by the FPPA Board of Directors. Excess contributions fund the Money Purchase Component of the plan. The Defined Benefit Component contribution rate from July 1, 2019 through June 30, 2020 was 13.80%. The defined benefit component contribution rate from July 1, 2018 through June 30, 2019 was 13.40%.

Within the Money Purchase Component, members are always fully vested in their own contributions, as well as the earnings on those contributions. Vesting in the employer's contribution within the Money Purchase Component, and earnings on those contributions occurs according to the vesting schedule set by the plan document at 20% per year after the first year of service to be 100% vested after 5 years of service. Employers and member contributions are invested in funds at the discretion of members. Employer contributions recognized by SWHDBP from the District were \$8,225 for the year ended December 31, 2020.

Pension Assets, Pension Benefit, Deferred Outflows Of Resources And Deferred Inflows Of Resources Related To Pensions

At December 31, 2020, the District reported a net pension asset of \$92,939 for its proportionate share of the net pension asset. The net pension asset was measured as of December 31, 2019, and the total pension asset was determined by an actuarial valuation as of January 1, 2020. The District's proportion of the net pension asset was based on District contributions to SWHDBP for the calendar year 2019 relative to the total contributions of participating employers to SWHDBP based upon the January 1, 2019 actuarial valuation.

Notes To Financial Statements (Continued)

At December 31, 2019, the District's portion was 0.477244%, which was a decrease of 0.017931% from its proportion measured as of December 31, 2018.

For the year ended December 31, 2020, the District recognized a pension benefit of \$8,261. At December 31, 2020, the District reported deferred outflows and inflows of resources related to SWHDBP from the following sources:

Deferred Outflows Of Resources	
Changes of assumptions	\$ 7,878
Differences between expected and actual experience	44,093
Changes in proportionate share	34,541
Contributions subsequent to measurement date	8,225
Total Deferred Outflows Of Resources	\$ 94,737
Deferred Inflows Of Resources	
Difference between projected and actual	
earnings on pension plan investments	\$ 11,404
Changes in proportionate share	9,809

The amount of \$8,225 reported as deferred outflows of resources related to SWHDBP, resulting from contributions subsequent to the measurement date, will be recognized as an increase of the net pension asset in the year ended December 31, 2021. Other amounts reported as deferred outflows of resources related to SWHDBP will be recognized in pension expense as follows:

For The Year	
Ended December 31,	
2021	\$ 15,996
2022	15,070
2023	18,712
2024	10,403
2025	4,741
Thereafter	377
Total	\$ 65,299

Notes To Financial Statements (Continued)

Actuarial Assumptions

The January 1, 2020 actuarial valuation was used to determine the actuarially determined contribution for the fiscal year ending December 31, 2019. The valuation used the following actuarial assumption and other inputs:

_	Total Pension Liability	Actuarially Determined Contributions
Valuation date	January 1, 2020	January 1, 2019
Actuarial cost method	Entry age normal	Entry age normal
Amortization method	N/A	Level % payroll, open
Remaining amortization period	N/A	30 years
Actuarial assumptions:		
Investment rate of return*	7.0%	7.0%
Projected salary increases*	4.25% - 11.25%	4.25% - 11.25%
Cost of living adjustments	0.0%	0.0%
* Includes inflation at:	2.5%	2.5%

For determining the total pension liability, the post-retirement mortality tables for nondisabled retirees uses the 2006 central rates from the RP-2014 Annuitant Mortality Tables projected to 2018 using the MP-2017 projection scales, and the projected prospectively using the ultimate rates of the scale for all years. The pre-retirement off-duty mortality tables are adjusted to 55% of the RP-2014 mortality tables for active employees. The on-duty mortality rate is 0.00020.

For determining the actuarial determined contributions, the post-retirement mortality tables for nondisabled retirees is a blend of the Annuitant and Employee RP-2014 generational mortality tables with blue collar adjustment projected with Scale BB. The pre-retirement off-duty mortality tables are adjusted to 55% of the RP-2014 mortality tables for active employees. The on-duty mortality rate is 0.00020.

Notes To Financial Statements (Continued)

At least every five years, FPPA's Board of Directors, in accordance with best practices, reviews its economic and demographic actuarial assumptions. At its July 2018 meeting, the Board of Directors reviewed and approved recommended changes to the actuarial assumptions. The recommendations were made by FPPA's actuaries, Gabriel, Roeder, Smith & Co., based upon their analysis of past experience and expectations of the future. The assumption changes were effective for actuarial valuations beginning January 1, 2019 and were used in the rollforward calculation of total pension liability as of December 31, 2018. Actuarial assumptions effective for actuarial valuations prior to January 1, 2019 were used in the determination of the actuarially determined contributions as of December 31, 2018. The actuarial assumptions impact actuarial factors for benefit purposes such as purchases of service credit and other benefits where actuarial factors are used.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation (assumed at 2.5%). Best estimates of arithmetic real rates of return for each major asset class included in the fund's target asset allocation as of December 31, 2019 are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Rate Of Return
Global equity	38.00%	7.00%
Equity long/short	8.00%	6.00%
Private markets	25.00%	9.20%
Fixed income	15.00%	5.20%
Absolute return	8.00%	5.50%
Managed futures	4.00%	5.00%
Cash	2.00%	2.52%
Total	100.00%	

Notes To Financial Statements (Continued)

Discount Rate

The discount rate used to measure the total pension liability was 7.0%. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the Board's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, the SWHDBP plan fiduciary net position was projected to be available to make all the projected future benefit payments to current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Projected benefit payments are required to be discounted to their actuarial present values using a single discount rate that reflects (1) a long-term expected rate of return on pension plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits) and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the plan's projected fiduciary net position is not sufficient to pay benefits).

For the purpose of the valuation, the expected rate of return on pension plan investments is 7.0%, the municipal bond rate is 2.75% (based on the weekly rate closest to but not later than the measurement date of the state and local bonds rate from Federal Reserve statistical release (H.15)) and the resulting single discount rate is 7.0%.

Sensitivity Of The District's Proportionate Share Of The Net Pension Asset To Changes In The Discount Rate

Regarding the sensitivity of the net pension asset to changes in the single discount rate, the following presents the plan's net pension asset, calculated using a single discount rate of 7.0%, as well as what the plan's net pension asset would be if it were calculated using a single discount rate that is one percent lower (6.0%) or one percent higher (8.0%):

	D	1% Decrease (6.0%)		iscount Rate (7.0%)	1% Increase (8.0%)
Proportionate share of the net pension asset	\$	56,526	\$	92,939	\$ 123,400

Notes To Financial Statements (Continued)

Pension Plan Fiduciary Net Position

Detailed information about SWHDBP's fiduciary net position is available in FPPA's comprehensive annual financial report, which can be obtained at http://www.fppaco.org.

8. Deferred Compensation Plan

The District participates in a deferred compensation plan (the 457 Plan) as defined under the Internal Revenue Code Section 457, which allows employees to make an elective deferral of a portion of earned compensation to the 457 Plan. The 457 Plan is a multi-employer plan administered by FPPA. Amendments to the 457 Plan may be made by the plan trustee. The District does not match employee contributions to the 457 Plan. For the year ended December 31, 2020, participating employees contributed \$26,602 to the 457 Plan.

9. Tax, Spending And Debt Limitations

Colorado voters passed an amendment to the State Constitution, Article X, Section 20, otherwise known as the Taxpayer Bill of Rights (TABOR), which has several limitations, including revenue raising, spending abilities and other specific requirements of state and local governments. TABOR is complex and subject to judicial interpretation. The District believes it is in compliance with the requirements of TABOR. However, the District has made certain interpretations of TABOR's language in order to determine its compliance. In May 1998, the District voters approved the District to collect, retain and spend all revenues and other funds collected from any source not excluded from fiscal year spending, effective January 1, 1998 and continuing thereafter.

Fund balance in the General Fund in the amount of \$124,184 at December 31, 2020 is restricted in accordance with TABOR.

Notes To Financial Statements (Continued)

10. Risk Of Loss

The District is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries and natural disasters. The District carries commercial insurance for all risks of loss, including workers' compensation and employee health and accident insurance. The District retains no risk of loss. There have been no settled claims resulting from these risks that have exceeded commercial insurance coverage in any of the past three fiscal years. There have been no significant reductions in insurance coverage.

11. Litigation

From time to time, the District is subject to claims and lawsuits that arise primarily in the ordinary course of its activities. It is the opinion of management that the disposition or ultimate resolution of such claims and lawsuits will not have a material adverse effect on the net position and change in net position of the District. Events could occur that would change this estimate materially in the near term.

12. Risks And Uncertainties

On March 11, 2020, the World Health Organization recognized COVID-19 as a global pandemic, prompting many national, regional and local governments to implement preventative or protective measures, such as travel and business restrictions, wide-sweeping quarantines and stay-at-home orders. As a result, COVID-19 and the related restrictive measures have had a significant adverse impact upon many sectors of the economy. There continues to be uncertainty around the breadth and duration of the business disruptions related to COVID-19, as well as its impact on the U.S. and international economies. The District is unable to determine if it will have a material impact on its future operations.

13. Subsequent Events

Management evaluates subsequent events through the date the financial statements are available to be issued, which is the date of the Independent Auditors' Report.

NOTE TO REQUIRED SUPPLEMENTARY INFORMATION December 31, 2020

1. Budgets And Budgetary Accounting

The Board adopts an annual budget for the General and Debt Service Funds. Budgeted amounts for all funds are based on legally adopted budgets, including supplemental budget appropriations, if any, which are on a basis consistent with GAAP for each fund type. The Fire Chief is authorized to transfer budgeted amounts within and among departments; however, any revisions that alter total expenditures for any of the funds must be approved by the Board.

The budgetary comparison schedule included in the required supplementary information presents a comparison of budgetary data to actual results of operations for the General Fund, for which an annual operating budget is legally adopted. This fund utilizes the same basis of accounting for both budgetary purposes and actual results. The General Fund recognizes an expenditure for contingencies and capital replacements in its budget-basis expenditures.

Annual budgets are established for all funds of the District as required by Colorado law. Budgets reported in the accompanying financial statements are on the same basis of accounting as described above.

Expenditures may not legally exceed appropriations at the fund level. Budget amounts included in the financial statements are based on the final amended budget. After budget approval, the District Board may approve supplemental appropriations if an occurrence, condition or need exists which was not known at the time the budget was adopted. Certain General Fund expenditures exceeded appropriated amounts, which may be a violation of Colorado Revised Statutes.

On or before October 15 of each year, the District's budget officer must prepare and submit a proposed budget to the Board for the next fiscal year. Thereupon, notice must be published stating, among other things, that the budget is open to inspection by the public and that interested electors may file or register any objection to the budget.

Note To Required Supplementary Information (Continued)

Subject to certain exceptions and exclusions discussed hereafter, the District must submit a request for property tax increases in excess of the statutory limitation to the Division of Local Government (if within TABOR limits) or submit the question of an increased level directly to the electors of the District at a general or special election. State law requires that the District adopt a budget prior to the certification of its mill levy to the County and file a certified copy of its budget with the Division of Local Government within 30 days of such adoption. Failure to do so can result in the County Treasurer's withholding future property tax revenues pending compliance by the District. Budget appropriations lapse at the end of each year. The encumbrance method is not used.
